Title: The Last Shelf

Text:

Maya arrived early to help Mr. Alvarez close the neighborhood library before its renovation. Most books had already been packed, but one high shelf remained. Mr. Alvarez handed her a ladder and a box labeled LOCAL HISTORY.

At first, Maya worked quickly. Then a thin blue notebook slipped from between two large volumes. Its pages held sketches of storefronts, handwritten bus schedules, and notes about trees that no longer shaded the avenue. On the final page, someone had drawn the library as it looked fifty years earlier.

“This is not a library book,” Maya said.

Mr. Alvarez studied the notebook. “No, but it may belong here.”

Maya wanted to keep looking through it, yet the moving crew would arrive soon. She placed the notebook in the box, then crossed out LOCAL HISTORY and wrote LOCAL MEMORY beneath it. Mr. Alvarez smiled but said nothing.

Weeks later, the renovated library reopened with brighter rooms and new computers. Near the entrance stood a small glass case. Inside was the blue notebook, opened to the drawing of the old library. A card invited visitors to add copies of their own photographs and memories to a new community collection. Maya paused beside the case, pleased that one forgotten object had made room for many stories.

Section: Reading Comprehension

Stimulus Type: Scientific Passage

Title: Cooling a City Block

Text:

On summer afternoons, city streets can become much warmer than nearby parks. Dark roofs and pavement absorb sunlight and release the stored heat slowly. This effect can raise temperatures in densely built neighborhoods, especially after sunset.

Some cities are testing “cool corridors” to reduce this problem one block at a time. A cool corridor may combine light-colored pavement, shade trees, planted areas, and covered bus stops. Each feature helps differently. Pale surfaces reflect more sunlight than dark ones. Trees block sunlight and release water vapor through their leaves, which cools the surrounding air. Planted soil also absorbs rain that might otherwise rush into storm drains.

Designers cannot simply copy one plan everywhere. A narrow street may lack space for large trees, while a busy intersection may need surfaces that withstand heavy traffic. Researchers therefore measure surface temperature, air temperature, shade, and water flow before and after making changes.

Early results suggest that a network of improved blocks can make walking more comfortable and reduce heat exposure. However, researchers emphasize that cool corridors work best as part of a broader plan that also includes parks, efficient buildings, and access to indoor cooling. The goal is not to make every street identical, but to choose the combination of features that fits each location.

ANSWER KEY + EXPLANATIONS

MATHEMATICS ANSWERS

COOP-M1-001 - Correct: A - Correct Answer: $1 \frac{3}{8}$ - Explanation: Convert $\frac{3}{4}$ to $\frac{6}{8}$, then add $\frac{6}{8} + \frac{5}{8} = \frac{11}{8} = 1 \frac{3}{8}$.

COOP-M1-002 - Correct: B - Correct Answer: \$54 - Explanation: The discount is $\$72 \times 0.25 = \18 , so the sale price is $\$72 - \$18 = \$54$.

COOP-M1-003 - Correct: C - Correct Answer: 36 - Explanation: Thirty-six is the smallest positive number divisible by both 12 and 18.

COOP-M1-004 - Correct: D - Correct Answer: 5 - Explanation: Divide by 4 to get $2x - 3 = 7$; then $2x = 10$, so $x = 5$.

COOP-M1-005 - Correct: A - Correct Answer: \$22.00 - Explanation: Each notebook costs $\$13.75 \div 5 = \2.75 ; eight cost $8 \times \$2.75 = \22.00 .

COOP-M1-006 - Correct: B - Correct Answer: 7 - Explanation: Substitute 19 for y: $19 = 3x - 2$, so $21 = 3x$ and $x = 7$.

COOP-M1-007 - Correct: C - Correct Answer: 38 centimeters - Explanation: The width is $84 \div 12 = 7$ centimeters, so the perimeter is $2(12 + 7) = 38$ centimeters.

COOP-M1-008 - Correct: D - Correct Answer: 90° - Explanation: Since $6x = 180^\circ$, $x = 30^\circ$; therefore, the largest angle is $3x = 90^\circ$.

COOP-M1-009 - Correct: A - Correct Answer: 2,500 milliliters - Explanation: One liter equals 1,000 milliliters, so $2.5 \times 1,000 = 2,500$ milliliters.

COOP-M1-010 - Correct: B - Correct Answer: 21 - Explanation: The total is $5 \times 18 = 90$; the known scores total 69, leaving $90 - 69 = 21$.

READING COMPREHENSION ANSWERS

COOP-R1-001 - Correct: A - Correct Answer: Sketches, schedules, and observations about the neighborhood - Explanation: The notebook contains storefront sketches, bus schedules, and notes about neighborhood trees.

COOP-R1-002 - Correct: B - Correct Answer: Preserving one person's record can encourage a community to share its history. - Explanation: The recovered notebook becomes the starting point for a collection of many residents' memories.

COOP-R1-003 - Correct: C - Correct Answer: He understands that Maya recognizes the notebook's wider value. - Explanation: Maya's new label shows that she sees the notebook as a record of shared community memory.

COOP-R1-004 - Correct: D - Correct Answer: Stopped briefly - Explanation: Maya momentarily stops beside the display to consider the notebook and the collection it inspired.

COOP-R1-005 - Correct: B - Correct Answer: Maya discovers a neighborhood notebook that inspires a community collection. - Explanation: This choice includes both Maya's discovery and its most important result.

COOP-R1-006 - Correct: C - Correct Answer: They reflect more sunlight. - Explanation: The passage directly states that pale surfaces reflect more sunlight than dark surfaces.

COOP-R1-007 - Correct: A - Correct Answer: The width of the street - Explanation: The passage explains that a narrow street may not have enough space for large trees.

COOP-R1-008 - Correct: B - Correct Answer: Cool corridors combine location-specific features to reduce heat and improve city blocks. - Explanation: The passage describes several cooling features and emphasizes choosing combinations suited to each location.

COOP-R1-009 - Correct: C - Correct Answer: To determine whether the changes produced measurable improvements - Explanation: Comparing measurements from before and after allows researchers to evaluate the effects of the changes.

COOP-R1-010 - Correct: D - Correct Answer: It explains a problem, describes possible responses, and discusses their limits. - Explanation: The passage introduces urban heat, presents cool-corridor strategies, and explains why plans must vary.

VOCABULARY ANSWERS

COOP-V1-001 - Correct: A - Correct Answer: hesitant - Explanation: "Reluctant" means unwilling or hesitant to act.

COOP-V1-002 - Correct: B - Correct Answer: long-lasting - Explanation: Something durable is able to remain useful or withstand wear for a long time.

COOP-V1-003 - Correct: C - Correct Answer: confirm - Explanation: To verify something is to check and confirm that it is accurate.

COOP-V1-004 - Correct: D - Correct Answer: plentiful - Explanation: "Scarce" means limited or hard to find, while "plentiful" means abundant.

COOP-V1-005 - Correct: C - Correct Answer: contract - Explanation: To expand is to become larger; to contract is to become smaller.

COOP-V1-006 - Correct: D - Correct Answer: lacking organization - Explanation: The contrast with the orderly second rehearsal shows that "disorderly" means poorly organized.

COOP-V1-007 - Correct: A - Correct Answer: happening in small stages - Explanation: The gently climbing trail shows that "gradual" means occurring slowly or in small stages.

COOP-V1-008 - Correct: B - Correct Answer: brief and direct - Explanation: Covering essential facts in two minutes indicates that the report was brief and direct.

COOP-V1-009 - Correct: C - Correct Answer: book - Explanation: A petal is part of a flower, just as a page is part of a book.

COOP-V1-010 - Correct: D - Correct Answer: weight - Explanation: A thermometer measures temperature, while a scale measures weight.

GRAMMAR ANSWERS

COOP-G1-001 - Correct: A - Correct Answer: Neither of the two routes leads directly to the museum. - Explanation: The singular subject "neither" requires the singular verb "leads."

COOP-G1-002 - Correct: B - Correct Answer: All cyclists must check their helmets before the race. - Explanation: The plural pronoun "their" and noun "helmets" agree clearly with the plural antecedent "cyclists."

COOP-G1-003 - Correct: C - Correct Answer: By noon, the workers had drunk all the water. - Explanation: The past participle "drunk" correctly follows the helping verb "had."

COOP-G1-004 - Correct: D - Correct Answer: The final decision belongs to Elena and him. - Explanation: The object pronoun "him" correctly follows the preposition "to."

COOP-G1-005 - Correct: A - Correct Answer: After the storm ended, the neighbors inspected the park. - Explanation: A comma correctly follows the introductory dependent clause.

COOP-G1-006 - Correct: D - Correct Answer: The ushers added another row of chairs near the back. - Explanation: This choice contains a subject, a complete predicate, and a complete thought.

COOP-G1-007 - Correct: A - Correct Answer: The committee is reviewing the proposal. - Explanation: This revision removes redundant time expressions while preserving the original meaning.

COOP-G1-008 - Correct: B - Correct Answer: Sentence 4 - Explanation: The postcard collection does not support the passage's focus on mapping public drinking fountains.

COOP-G1-009 - Correct: C - Correct Answer: Last spring, our science club mapped the neighborhood's public drinking fountains. - Explanation: This revision expresses the complete idea concisely without a fragment or run-on.

COOP-G1-010 - Correct: D - Correct Answer: The finished map was posted online; as a result, residents could plan walking routes with reliable water stops. - Explanation: The semicolon joins related independent clauses, and commas correctly set off the transition.

SPELLING ANSWERS

COOP-S1-001 - Correct: A - Correct Answer: maintenance - Explanation: "Maintenance" is the correct standard spelling.

COOP-S1-002 - Correct: B - Correct Answer: occurrence - Explanation: "Occurrence" is spelled with double c and double r.

COOP-S1-003 - Correct: C - Correct Answer: independent - Explanation: "Independent" is the correct standard spelling.

COOP-S1-004 - Correct: D - Correct Answer: mecanism - Explanation: "Mecanism" is misspelled; the correct form is "mechanism."

COOP-S1-005 - Correct: A - Correct Answer: soluton - Explanation: "Soluton" is misspelled; the correct form is "solution."

COOP-S1-006 - Correct: B - Correct Answer: performence - Explanation: "Performence" is misspelled; the correct form is "performance."

COOP-S1-007 - Correct: A - Correct Answer: affect - Explanation: The verb "affect" means to influence, which fits the sentence.

COOP-S1-008 - Correct: B - Correct Answer: there - Explanation: "There" correctly refers to a place.

COOP-S1-009 - Correct: C - Correct Answer: libraries - Explanation: For a consonant followed by y, change y to i and add "es."

COOP-S1-010 - Correct: D - Correct Answer: admitted - Explanation: The final consonant is doubled before adding "ed" to "admit."

Title: A Different Route

Text:

For three Saturdays, Jonah had followed the same path through the outdoor market, delivering bread from his aunt's bakery to a café at the far gate. He knew which aisles were crowded and which vendor always left empty crates in the way.

On the fourth Saturday, a puppet performance blocked his usual shortcut. Jonah glanced at the bakery clock painted on the delivery box. He had twelve minutes. Turning back would take too long, so he entered an aisle he had never used.

The unfamiliar route curved past stalls filled with brass bells, woven baskets, and jars of spices. Near the end, Jonah found an elderly vendor struggling to lift a fallen sign. He set down the bread, raised the sign, and secured it against the stall. The vendor thanked him and pointed to a narrow passage behind a curtain of hanging rugs.

Jonah emerged beside the café with two minutes to spare. After handing over the bread, he realized he could still hear the puppet audience laughing across the market. On his return, he did not use the narrow passage. Instead, he walked slowly through the new aisle, noticing the careful patterns in the baskets and the bright labels on the spice jars. The delay he had dreaded had shown him how much his efficient route had allowed him to miss.

Title: Messages on the Mountain

Text:

Before electronic communication reached many remote regions, mountaintop fire stations played an important role in protecting forests. From towers built above the tree line, observers watched for thin columns of smoke. Finding a fire, however, was only the first challenge. The observer also had to report its location quickly and accurately.

Some stations used special telephone lines, but storms and falling branches could damage the wires. In other places, observers sent messages by radio. Early radios were heavy, required large batteries, and sometimes produced unclear signals among mountains. When equipment failed, a written message might travel downhill with a ranger on horseback or on foot.

Observers used maps and circular sighting instruments to estimate a fire's direction. Reports from two or more towers could then be compared. Where the reported directions crossed, officials had a better estimate of the fire's position. This method reduced the chance that crews would waste time searching a wide area.

Modern satellites, aircraft, cameras, and digital mapping now help detect and locate fires. Yet lookout stations have not disappeared entirely. In some regions, trained observers still provide valuable judgment: they can distinguish smoke from dust, describe changing weather, and notice conditions that an automatic sensor may not fully explain.

ANSWER KEY + EXPLANATIONS

MATHEMATICS ANSWERS

COOP-M1-011 - Correct: A - Correct Answer: 3 - Explanation: Convert $2\frac{1}{3}$ to $\frac{7}{3}$, then multiply by $\frac{9}{7}$; $(\frac{7}{3}) \times (\frac{9}{7}) = 3$.

COOP-M1-012 - Correct: B - Correct Answer: $6 - 2 \times 10$ - Explanation: Multiplication comes first, so $6 - 20 = -14$.

COOP-M1-013 - Correct: C - Correct Answer: $1.50m + 4$ - Explanation: The variable charge is \$1.50 for each mile, and the fixed \$4 charge is added once.

COOP-M1-014 - Correct: D - Correct Answer: 3 - Explanation: Simplifying gives $3 - 6x = -15$, so $-6x = -18$ and $x = 3$.

COOP-M1-015 - Correct: C - Correct Answer: 64 square centimeters - Explanation: For a square, $d = s\sqrt{2}$; therefore $s = 8$ and the area is $8^2 = 64$.

COOP-M1-016 - Correct: D - Correct Answer: 5 centimeters - Explanation: Using $C = 2\pi r$ gives $31.4 = 6.28r$, so $r = 5$ centimeters.

COOP-M1-017 - Correct: A - Correct Answer: 56 miles per hour - Explanation: Two hours fifteen minutes is 2.25 hours, and $126 \div 2.25 = 56$.

COOP-M1-018 - Correct: B - Correct Answer: 270 square feet - Explanation: The actual dimensions are 15 feet by 18 feet, so the area is $15 \times 18 = 270$ square feet.

COOP-M1-019 - Correct: C - Correct Answer: $1/16$ - Explanation: The chance of blue each time is $3/12 = 1/4$; with replacement, $(1/4) \times (1/4) = 1/16$.

COOP-M1-020 - Correct: D - Correct Answer: The value of x cannot be determined. - Explanation: Any x greater than 18 leaves 12 and 16 as the middle values, so the median remains 14.

READING COMPREHENSION ANSWERS

COOP-R1-011 - Correct: A - Correct Answer: A performance blocks his usual shortcut. - Explanation: The passage states that the puppet performance prevents Jonah from taking his normal route.

COOP-R1-012 - Correct: B - Correct Answer: An unexpected change can reveal something valuable. - Explanation: The blocked route leads Jonah to new sights and a broader appreciation of the market.

COOP-R1-013 - Correct: C - Correct Answer: He values speed and predictability. - Explanation: Jonah has memorized the quickest route and immediately worries about the limited delivery time.

COOP-R1-014 - Correct: D - Correct Answer: feared - Explanation: Jonah initially worries that the delay will prevent him from completing the delivery on time.

COOP-R1-015 - Correct: A - Correct Answer: A blocked route leads Jonah to help someone and appreciate parts of the market he had overlooked. - Explanation: This choice includes the main obstacle, Jonah's helpful action, and the change in his perspective.

COOP-R1-016 - Correct: C - Correct Answer: Their crossing directions helped estimate a fire's location. - Explanation: Officials compared directions from towers and used their intersection to estimate the fire's position.

COOP-R1-017 - Correct: D - Correct Answer: Crews could reach the area without wasting time on a broad search. - Explanation: The passage explains that a better location estimate reduced time spent searching a wide area.

COOP-R1-018 - Correct: A - Correct Answer: recognize the difference between - Explanation: Observers use judgment to tell smoke apart from dust.

COOP-R1-019 - Correct: B - Correct Answer: It contrasts modern tools with the continuing value of human observers. - Explanation: The paragraph names modern technology but explains abilities that still make trained observers useful.

COOP-R1-020 - Correct: D - Correct Answer: To explain how lookout stations communicated fire locations and why observers can still be useful - Explanation: The passage describes earlier reporting methods and concludes with the continuing contribution of human observers.

VOCABULARY ANSWERS

COOP-V1-011 - Correct: A - Correct Answer: striking - Explanation: "Vivid" describes something clear, intense, or striking.

COOP-V1-012 - Correct: B - Correct Answer: gather - Explanation: To assemble people or objects is to bring or gather them together.

COOP-V1-013 - Correct: C - Correct Answer: flexible - Explanation: "Rigid" means stiff or inflexible, making "flexible" its opposite.

COOP-V1-014 - Correct: D - Correct Answer: reveal - Explanation: To conceal is to hide, while to reveal is to make known or visible.

COOP-V1-015 - Correct: A - Correct Answer: permanent - Explanation: Something temporary lasts for a limited time, while something permanent is intended to last.
COOP-V1-016 - Correct: B - Correct Answer: connected to the subject - Explanation: The example is relevant because it directly relates to the class's discussion.
COOP-V1-017 - Correct: C - Correct Answer: easily damaged - Explanation: The hikers' caution shows that the bridge may break or be damaged easily.

Title: The Unfinished Tune

Text:

Lena had promised to play an original tune at her grandfather's birthday dinner. By Friday evening, however, her melody still ended with three awkward notes. She tried making them louder, softer, faster, and slower. Nothing sounded final.

From the kitchen came the steady tap of her grandfather slicing vegetables. Lena carried her flute to the doorway and played the troublesome ending.

"It sounds like it is asking a question," he said.

"It is supposed to give an answer."

Her grandfather placed the knife beside the cutting board. "Then perhaps you are answering too quickly."

Lena returned to the living room. Instead of changing the three notes again, she inserted a measure of silence before them. The pause felt uncomfortably long at first. Then she played the passage from the beginning. This time, the last notes seemed to arrive naturally, as if the melody had taken a breath before speaking.

At dinner the next night, Lena reached the silent measure and lowered her flute. A cousin shifted in his chair, but her grandfather remained perfectly still. When the final notes came, he nodded before anyone applauded.

Later, Lena wrote the tune's title across the page: "Room to Answer." She had spent hours searching for more sound, only to discover that the music needed less.

Title: Lending More Than Books

Text:

Many libraries now lend objects as well as printed materials. These collections, sometimes called “libraries of things,” may include tools, sewing machines, musical instruments, board games, or equipment for measuring home energy use. The idea is simple: an object needed only occasionally may serve many people instead of sitting unused in one household.

Choosing what to lend requires careful planning. Library staff often survey residents, examine storage space, and consider whether an item can be inspected and cleaned between loans. A power drill may be useful, but it also requires clear safety instructions. A telescope may attract interest, yet its delicate parts demand protective packaging.

These programs can reduce the cost of trying a new activity or completing a brief project. They may also reduce waste by decreasing the number of rarely used objects people purchase. Still, a collection does not automatically succeed. Items must be maintained, borrowers need fair access, and replacement costs must fit the library's budget.

Some libraries begin with a small group of durable objects and track which ones are requested most often. The data help staff expand thoughtfully rather than simply collecting whatever is donated. In this way, a library of things follows a familiar library principle: resources are most useful when they are selected carefully, shared widely, and kept in good condition.

ANSWER KEY + EXPLANATIONS

MATHEMATICS ANSWERS

COOP-M1-021 - Correct: A - Correct Answer: 13 - Explanation: $|-18| = 18$ and $|7 - 12| = 5$, so $18 - 5 = 13$.

COOP-M1-022 - Correct: B - Correct Answer: $\frac{4}{5}$ cup - Explanation: Convert $2\frac{2}{5}$ to $\frac{12}{5}$, then divide by 3: $\frac{12}{5} \div 3 = \frac{4}{5}$.

COOP-M1-023 - Correct: C - Correct Answer: $\frac{12}{25}$ - Explanation: Write 0.48 as $\frac{48}{100}$ and divide numerator and denominator by 4.

COOP-M1-024 - Correct: D - Correct Answer: $n \leq 6$ - Explanation: From $3n + 7 \leq 25$, subtract 7 and divide by 3 to obtain $n \leq 6$.

COOP-M1-025 - Correct: A - Correct Answer: 48 - Explanation: In 9 minutes the tank loses $9 \times 8 = 72$ gallons, leaving $120 - 72 = 48$.

COOP-M1-026 - Correct: C - Correct Answer: 7 - Explanation: Adding 6 changes the orange ratio value from 5 to 11, so one ratio unit equals 1 and there are 7 white beads.

COOP-M1-027 - Correct: B - Correct Answer: 202 square centimeters - Explanation: Surface area is $2(9 \times 4 + 9 \times 5 + 4 \times 5) = 2(101) = 202$.

COOP-M1-028 - Correct: C - Correct Answer: 20 centimeters - Explanation: The scale factor is $\frac{15}{6} = 2.5$, so the corresponding side is $8 \times 2.5 = 20$ centimeters.

COOP-M1-029 - Correct: D - Correct Answer: 9:25 p.m. - Explanation: Adding 2 hours gives 8:47 p.m.; adding 38 minutes gives 9:25 p.m.

COOP-M1-030 - Correct: A - Correct Answer: $1\frac{1}{3}$ - Explanation: The original total is 60; adding 20 gives 80, and $80 \div 6 = 13\frac{1}{3}$, an increase of $1\frac{1}{3}$.

READING COMPREHENSION ANSWERS

COOP-R1-021 - Correct: A - Correct Answer: She adds a measure of silence. - Explanation: Lena stops altering the notes and places a pause immediately before them.

COOP-R1-022 - Correct: B - Correct Answer: Solving a creative problem may require space rather than more additions. - Explanation: The melody improves when Lena adds silence instead of adding or changing sound.

COOP-R1-023 - Correct: C - Correct Answer: He recognizes that Lena understood his suggestion. - Explanation: His nod follows the successful pause that reflects his advice about not answering too quickly.

COOP-R1-024 - Correct: D - Correct Answer: in a fitting and unforced way - Explanation: After the pause, the ending no longer sounds awkward but arrives appropriately within the melody.

COOP-R1-025 - Correct: B - Correct Answer: Lena learns that a well-placed pause can complete the melody she has struggled to finish. - Explanation: This choice captures Lena's difficulty, discovery, and successful result.

COOP-R1-026 - Correct: A - Correct Answer: Its parts are delicate and need protection. - Explanation: The passage specifically states that a telescope's delicate parts require protective packaging.

COOP-R1-027 - Correct: D - Correct Answer: Begin with durable items and track demand - Explanation: Some libraries test a small durable collection and record which objects borrowers request.

COOP-R1-028 - Correct: B - Correct Answer: Libraries of things can provide benefits but require thoughtful selection and management. - Explanation: The passage balances the programs' advantages with their practical planning and maintenance needs.

COOP-R1-029 - Correct: C - Correct Answer: It helps staff base future choices on demonstrated interest. - Explanation: Request data show which objects people actually use, guiding thoughtful expansion.

COOP-R1-030 - Correct: D - Correct Answer: It introduces a service, explains its benefits and challenges, and describes a cautious approach. - Explanation: The passage defines the program, evaluates it, and explains how libraries can develop it carefully.

VOCABULARY ANSWERS

COOP-V1-021 - Correct: A - Correct Answer: thorough - Explanation: "Meticulous" describes work done with great care and thorough attention to detail.

COOP-V1-022 - Correct: B - Correct Answer: careful - Explanation: A cautious person acts carefully to avoid danger or error.

COOP-V1-023 - Correct: C - Correct Answer: alter - Explanation: To modify something is to change or alter it.

COOP-V1-024 - Correct: D - Correct Answer: rare - Explanation: Something frequent happens often, while something rare happens infrequently.

COOP-V1-025 - Correct: A - Correct Answer: forbid - Explanation: To permit is to allow, while to forbid is to prohibit.

COOP-V1-026 - Correct: B - Correct Answer: enough for the purpose - Explanation: The lack of need for more information shows that the evidence was enough.

COOP-V1-027 - Correct: C - Correct Answer: clearly expressed - Explanation: The steps left nothing uncertain because they were stated clearly.

COOP-V1-028 - Correct: D - Correct Answer: walk - Explanation: A whisper is a quiet way to speak, just as a stroll is a leisurely way to walk.

COOP-V1-029 - Correct: A - Correct Answer: egg - Explanation: Bark is the outer covering of a tree, just as a shell is the outer covering of an egg.

COOP-V1-030 - Correct: B - Correct Answer: solution - Explanation: An answer responds to a question, just as a solution resolves a problem.

GRAMMAR ANSWERS

COOP-G1-021 - Correct: A - Correct Answer: Either the manager or the assistants are opening the exhibit. - Explanation: With "either...or," the verb agrees with the nearer plural subject "assistants."

COOP-G1-022 - Correct: B - Correct Answer: The two teams presented their proposals. - Explanation: The plural possessive pronoun "their" agrees with the plural antecedent "teams."

COOP-G1-023 - Correct: C - Correct Answer: Before the bus arrived, we had bought our tickets. - Explanation: The past perfect "had bought" marks the action completed before the bus arrived.

COOP-G1-024 - Correct: D - Correct Answer: Rosa and I volunteered to demonstrate. - Explanation: The subject pronoun "I" is correct within the compound subject.

COOP-G1-025 - Correct: C - Correct Answer: "Please close the window," Mr. Cole said. - Explanation: A comma belongs inside the closing quotation mark before the dialogue tag.

Title: The Second Impression

Text:

Priya had spent a week carving a small linoleum printing block for the arts fair. The design showed three rooftops beneath a crescent moon. Her first print, however, was disappointing. One roof vanished into a dark patch, and the moon appeared uneven.

She reached for a new block, but Mr. Bell stopped her. “Before you rebuild the picture,” he said, “find out what the first one can teach you.”

Priya cleaned the block and examined it under a lamp. The carving was sound; too much ink had filled its narrow grooves. She rolled a thinner layer across the surface and pressed another sheet of paper against it. The roofs appeared, but a pale gap crossed the sky. This time she noticed that she had applied uneven pressure.

On her third attempt, Priya placed a clean board over the paper and pressed it with both hands. The print lifted clearly: sharp rooftops, a silver-white moon, and a sky textured with fine lines.

At the fair, visitors admired the finished print. Priya displayed the first two attempts beside it. Their flaws no longer embarrassed her. Together, the three sheets showed something the final image alone could not: careful work was not a single perfect action, but a series of useful corrections.

Title: A Record Written in Ice

Text:

In places where snow remains year after year, new layers compress older snow into ice. Scientists can drill into this ice and remove long cylinders called ice cores. Each section of a core represents snow that fell during an earlier period.

Ice cores preserve several kinds of evidence. Dust can indicate dry or windy conditions. Ash may record a major volcanic eruption. Tiny bubbles contain samples of ancient air, allowing researchers to measure gases that were present when the ice formed. The relative amounts of certain oxygen forms can also help estimate past temperatures.

Reading an ice core is not as simple as counting perfectly visible annual rings. Wind may remove snow, melting may disturb layers, and pressure can deform the deepest ice. Researchers therefore compare evidence within a core and with information from other sources, such as ocean sediments or tree rings.

No single core describes the entire planet. A core from one location reflects that region most directly. Yet cores from several places can reveal patterns across long spans of time. Their greatest value comes from combining many clues, checking them against independent records, and recognizing the limits of each sample.

ANSWER KEY + EXPLANATIONS

MATHEMATICS ANSWERS

COOP-M1-031 - Correct: A - Correct Answer: \$156.40 - Explanation: The increased price is \$184; 85% of \$184 is \$156.40.

COOP-M1-032 - Correct: B - Correct Answer: 8 - Explanation: $7^3 + 5^2 = 368$, and $368 = 9 \times 40 + 8$.

COOP-M1-033 - Correct: C - Correct Answer: 20 - Explanation: Subtracting 3 gives $2x/5 = 8$; multiplying by $5/2$ gives $x = 20$.

COOP-M1-034 - Correct: D - Correct Answer: 45 - Explanation: The constant is $18/12 = 1.5$, so $y = 1.5 \times 30 = 45$.

COOP-M1-035 - Correct: B - Correct Answer: 12 - Explanation: The exterior angles total 360° , so the polygon has $360 \div 30 = 12$ sides.

COOP-M1-036 - Correct: C - Correct Answer: 15 inches - Explanation: The hypotenuse is $\sqrt{(9^2 + 12^2)} = \sqrt{225} = 15$ inches.

COOP-M1-037 - Correct: A - Correct Answer: 4 ounces - Explanation: Six pounds equals 96 ounces, and $96 \div 24 = 4$ ounces.

COOP-M1-038 - Correct: B - Correct Answer: 3 - Explanation: Three-fifths of 40 is 24 gallons; $24 \div 8 = 3$ gallons per minute.

COOP-M1-039 - Correct: D - Correct Answer: 5/8 - Explanation: The favorable results are 2, 3, 5, 6, and 7, giving 5/8.
COOP-M1-040 - Correct: D - Correct Answer: 34 - Explanation: Since 14 is least and k is greatest, $k - 14 = 20$, so $k = 34$.
