Stimulus Type: Literary Passage

Title: The Wind Test

Text:

Eli had built his kite for the park festival from thin wooden strips and blue paper. Indoors, its angles looked exact. Outside, the kite spun sideways and struck the grass.

“The wind is wrong,” Eli said.

His neighbor Tessa picked up the kite and noticed that one side of its tail had lost two cloth loops. She offered spare ribbon, but Eli hesitated. The loops would not match his careful design. When another gust bent the kite nearly flat, appearance seemed less important.

They tied short ribbons to the lighter side and launched again. The kite climbed, dipped, and then steadied. Eli added one more ribbon. Now the tail shifted evenly beneath it, and the kite rose above the trees.

At the festival, a judge asked why the tail used two materials. Eli started to apologize, then explained how each ribbon had changed the kite's balance. The judge examined the uneven tail and wrote something on her card.

Eli did not win the prize for finest construction. He received a smaller award for best field adjustment. Walking home, he realized the kite had taught him a distinction his ruler could not: precision meant building carefully, but skill also meant responding carefully when conditions changed.

Stimulus ID: COOP-R2-S02

Section: Reading Comprehension

Stimulus Type: Scientific Passage

Title: Seeds Carried Underground

Text:

Some woodland plants rely on ants to move their seeds. These seeds have small, nutrient-rich attachments that attract the insects. An ant carries a seed to its underground nest, removes the edible attachment, and leaves the seed itself in a chamber or waste area.

This journey can benefit the plant. Beneath the soil, the seed may be protected from animals that eat seeds and from fires that pass quickly across the ground. Ants also move seeds away from the parent plant, reducing competition for light, water, and minerals.

The partnership is not equally effective everywhere. Different ant species carry seeds varying distances, and some ants eat the attachment without moving the seed far. Soil conditions and changes in ant populations also influence whether a transported seed eventually grows.

Researchers study the process by marking seeds, observing nests, and comparing areas with different ant communities. They avoid judging success merely by counting seeds that disappear from a plant. A seed has not necessarily been successfully dispersed just because an ant picked it up. Researchers must determine where it was taken and whether its new location supports germination. Thus, a small interaction between an insect and a seed can shape the distribution of plants across a forest floor.

ANSWER KEY + EXPLANATIONS

MATHEMATICS ANSWERS

COOP-M2-001 - Correct: A - Correct Answer: 84 - Explanation: $0.35 \times 240 = 84$.

COOP-M2-002 - Correct: B - Correct Answer: 18 - Explanation: Eighteen is the greatest factor shared by 54 and 72.

COOP-M2-003 - Correct: C - Correct Answer: $\frac{8}{15}$ - Explanation: Using denominator 30 gives $\frac{25}{30} - \frac{9}{30} = \frac{16}{30} = \frac{8}{15}$.

COOP-M2-004 - Correct: D - Correct Answer: 7 - Explanation: Subtracting $3x$ and 4 gives $4x = 28$, so $x = 7$.

COOP-M2-005 - Correct: A - Correct Answer: 72 miles - Explanation: The rate is 12 miles per hour; $12 \times 6 = 72$.

COOP-M2-006 - Correct: B - Correct Answer: 29 - Explanation: $2(4^2) - 3 = 32 - 3 = 29$.

COOP-M2-007 - Correct: C - Correct Answer: 91 cm^2 - Explanation: Area is $\frac{1}{2}(10 + 16) \times 7 = 91$ square centimeters.

COOP-M2-008 - Correct: D - Correct Answer: 62° - Explanation: Complementary angles total 90° , so $90 - 28 = 62^\circ$.

COOP-M2-009 - Correct: A - Correct Answer: 460 - Explanation: Each meter contains 100 centimeters, so $4.6 \times 100 = 460$.

COOP-M2-010 - Correct: B - Correct Answer: $\frac{11}{20}$ - Explanation: Eleven of the 20 counters are black or white, giving $\frac{11}{20}$.

READING COMPREHENSION ANSWERS

COOP-R2-001 - Correct: A - Correct Answer: Two cloth loops are missing from one side of the tail. - Explanation: Tessa sees that one side of the tail has lost two loops.

COOP-R2-002 - Correct: B - Correct Answer: Skilled work includes adapting thoughtfully to real conditions. - Explanation: Eli succeeds when he adjusts his careful design in response to the wind.

COOP-R2-003 - Correct: C - Correct Answer: He worries the unmatched material will spoil the design's appearance. - Explanation: The passage says the ribbon would not match his carefully planned design.

COOP-R2-004 - Correct: D - Correct Answer: became stable - Explanation: After dipping, the kite becomes balanced and stable.

COOP-R2-005 - Correct: B - Correct Answer: Eli adjusts an imperfect kite and learns that skill includes adapting. - Explanation: The choice includes the problem, adjustment, and lesson.

COOP-R2-006 - Correct: C - Correct Answer: The plant's roots - Explanation: The ants eat the nutrient-rich attachment and leave the seed.

COOP-R2-007 - Correct: A - Correct Answer: It guarantees immediate growth. - Explanation: The passage explicitly identifies animals and fire as dangers reduced underground.

COOP-R2-008 - Correct: B - Correct Answer: Ants can help disperse seeds, but outcomes depend on species and conditions. - Explanation: The passage explains benefits as well as factors that limit success.

COOP-R2-009 - Correct: C - Correct Answer: Its destination may not support germination. - Explanation: Success depends on where the seed goes and whether it can germinate there.

COOP-R2-010 - Correct: D - Correct Answer: A process is explained, followed by benefits, limits, and research methods. - Explanation: The passage moves from process to value, variability, and investigation.

VOCABULARY ANSWERS

SECTION 2 - READING COMPREHENSION**The Blank Corner**

Stimulus ID: COOP-R2-S03 | Type: Literary Passage

Nora volunteered to draw a map for the neighborhood history walk. By Thursday afternoon, she had marked the old theater, the train depot, and the row of brick shops along Pine Street. Only the northern courtyard remained unfinished.

The courtyard had two entrances, but residents gave Nora different advice about them. Mr. Vega said the iron gate was usually open. A delivery driver said it was locked every morning. Two children insisted that a narrow passage behind the fountain was the quickest route. Nora could have selected one path and made the map look complete, yet she left the corner blank.

On Friday, she visited the courtyard at three different times. She watched the iron gate close during a delivery, then reopen when the truck departed. She also followed the passage behind the fountain and discovered that it ended at a stairway too narrow for wheelchairs and carts. Finally, the building custodian explained that the gate schedule changed during public events.

Nora returned to the map and drew the main entrance with a solid line. She added the narrow passage with a dashed line and a note about the stairs. Beside the gate, she wrote, "Check event access hours."

At the history walk, visitors paused at the northern corner of the map longer than anywhere else. The extra note did not make the map look uncertain. It made the map useful. Nora realized that the blank space had not been a failure to finish. It had been room for evidence.

COOP-R2-011

Skill: Supporting Detail or Textual Evidence

Stimulus ID: COOP-R2-S03

Why does Nora initially leave the northern corner of the map blank?

- A) Residents give conflicting information about the available routes.
- B) She has forgotten where the courtyard is located.
- C) The map does not have enough space for another street.
- D) The history walk has been canceled.

COOP-R2-012

COOP-R2-015

Skill: Summary, Literary Element, or Technique

Stimulus ID: COOP-R2-S03

Which choice best summarizes the passage?

- A) Nora removes the northern courtyard from a map after visitors complain about it.
- B) A custodian draws an entire neighborhood map while Nora watches.
- C) Nora investigates uncertain access routes and uses what she learns to make a more accurate map.
- D) Visitors choose the narrow stairway because it is the only entrance to the courtyard.

How Snow Fences Protect Roads

Stimulus ID: COOP-R2-S04 | Type: Informational Passage

A snow fence does not stop snowflakes from falling. Instead, it changes how wind carries loose snow across open ground. When strong wind moves over a field, it can lift dry snow and push it toward a road. The moving snow may reduce visibility or form deep drifts that block traffic.

Most snow fences are placed on the side of the road from which winter winds usually arrive. Their slats or openings allow some air to pass through. As the wind crosses the fence, it slows. The slower air can no longer carry as much snow, so snow begins to settle before it reaches the pavement.

A solid wall is often less effective than a porous fence. Air rushing over a solid barrier may create swirling currents that deposit snow in unpredictable places. Engineers also consider the fence's height and its distance from the road. A fence placed too close can cause a drift to form on the pavement rather than safely in the field.

Snow fences cannot prevent every winter closure. A severe storm may produce more snow than the protected area can hold, and changing wind directions can reduce a fence's effect. Even so, properly placed fences can lower plowing costs, improve visibility, and keep roads open longer. Road crews inspect the fences and surrounding drifts during the winter so they can adjust future placement.

COOP-R2-016

Skill: Supporting Detail or Textual Evidence

Stimulus ID: COOP-R2-S04

Where are most snow fences placed?

- A) On the side from which winter winds usually approach
- B) Directly across the pavement from one road edge to the other
- C) At the lowest point of every snowdrift
- D) Only beside roads that have no open fields nearby

COOP-R2-017

Skill: Main Idea, Central Thought, or Author's Purpose

Stimulus ID: COOP-R2-S04

What is the main purpose of the passage?

- A) To explain how snow fences influence drifting snow and why placement matters
- B) To argue that roads should remain closed throughout winter
- C) To compare the prices of several fence materials
- D) To describe how snowplows are manufactured

COOP-R2-018

Skill: Inference

Stimulus ID: COOP-R2-S04

Why are openings in a snow fence useful?

- A) They allow road crews to drive through the fence.
- B) They slow the wind without creating the same strong swirling currents as a solid wall.
- C) They warm the air enough to melt all nearby snow.
- D) They prevent any snow from settling near the fence.

COOP-R2-019

Skill: Vocabulary in Context

Stimulus ID: COOP-R2-S04

As used in the passage, what does "deposit" most nearly mean?

ANSWER KEY + EXPLANATIONS

MATHEMATICS ANSWERS

- COOP-M2-011 - Correct: D - Correct Answer: 74 - Explanation: Five-sixths of 72 is 60, and $60 + 14 = 74$.
- COOP-M2-012 - Correct: B - Correct Answer: $2\frac{1}{8}$ - Explanation: Convert to eighths: $3\frac{6}{8} - 1\frac{5}{8} = 2\frac{1}{8}$.
- COOP-M2-013 - Correct: C - Correct Answer: 9 - Explanation: Add 7 to obtain $4x = 36$, then divide by 4 to get $x = 9$.
- COOP-M2-014 - Correct: D - Correct Answer: \$18.00 - Explanation: Each notebook costs $\$10.50 \div 7 = \1.50 , and $12 \times \$1.50 = \18.00 .
- COOP-M2-015 - Correct: B - Correct Answer: 63 square centimeters - Explanation: The area is one-half times base times height: $\frac{1}{2} \times 14 \times 9 = 63$ square centimeters.
- COOP-M2-016 - Correct: A - Correct Answer: 53° - Explanation: The two acute angles of a right triangle total 90° , so $90^\circ - 37^\circ = 53^\circ$.
- COOP-M2-017 - Correct: B - Correct Answer: 12:23 p.m. - Explanation: Adding 2 hours gives 11:48 a.m.; adding 35 minutes gives 12:23 p.m.
- COOP-M2-018 - Correct: A - Correct Answer: 26 kilometers - Explanation: Multiply the map distance by the scale: $6.5 \times 4 = 26$ kilometers.
- COOP-M2-019 - Correct: C - Correct Answer: 18 - Explanation: The values total 90, and $90 \div 5 = 18$.
- COOP-M2-020 - Correct: A - Correct Answer: $\frac{8}{15}$ - Explanation: There are 15 tiles total and 8 are not blue, so the probability is $\frac{8}{15}$.

READING COMPREHENSION ANSWERS

- COOP-R2-011 - Correct: A - Correct Answer: Residents give conflicting information about the available routes. - Explanation: The passage states that residents disagree about when the gate is open and which route is best.
- COOP-R2-012 - Correct: B - Correct Answer: Reliable work may require delaying a conclusion until enough evidence is gathered. - Explanation: Nora postpones completing the map, gathers evidence, and produces a more useful result.
- COOP-R2-013 - Correct: D - Correct Answer: She values accuracy more than making the map appear finished quickly. - Explanation: Nora accepts an unfinished appearance rather than guess about the route, showing that accuracy matters most to her.
- COOP-R2-014 - Correct: B - Correct Answer: drawn with short separated marks - Explanation: The narrow passage is shown with a broken line rather than one continuous solid line.
- COOP-R2-015 - Correct: C - Correct Answer: Nora investigates uncertain access routes and uses what she learns to make a more accurate map. - Explanation: This choice includes the uncertainty, Nora's investigation, and the useful revision she makes.
- COOP-R2-016 - Correct: A - Correct Answer: On the side from which winter winds usually approach - Explanation: The second paragraph states that fences are placed on the upwind side of the road.
- COOP-R2-017 - Correct: A - Correct Answer: To explain how snow fences influence drifting snow and why placement matters - Explanation: The passage explains the fence's effect on wind and snow, design choices, limitations, and benefits.
- COOP-R2-018 - Correct: B - Correct Answer: They slow the wind without creating the same strong swirling currents as a solid wall. - Explanation: The passage contrasts porous fences with solid barriers that can create unpredictable air currents.
- COOP-R2-019 - Correct: C - Correct Answer: cause to settle - Explanation: The wind may cause snow to settle, or be deposited, in particular locations.
- COOP-R2-020 - Correct: D - Correct Answer: It explains a problem, describes how a tool addresses it, and discusses limits and benefits. - Explanation: The author first describes drifting snow, then explains fence operation and placement, followed by limitations and advantages.

VOCABULARY ANSWERS

- COOP-V2-011 - Correct: B - Correct Answer: brief - Explanation: Concise language is brief while still expressing the necessary information.
- COOP-V2-012 - Correct: D - Correct Answer: able to recover - Explanation: Something resilient can recover or return to shape after difficulty or pressure.
- COOP-V2-013 - Correct: A - Correct Answer: abundant - Explanation: Scarce means limited or hard to find, while abundant means plentiful.
- COOP-V2-014 - Correct: D - Correct Answer: opaque - Explanation: Transparent material can be seen through, while opaque material cannot.
- COOP-V2-015 - Correct: C - Correct Answer: flexible - Explanation: Rigid means stiff, whereas flexible means able to bend or adapt.
- COOP-V2-016 - Correct: B - Correct Answer: not yet final - Explanation: A tentative schedule is provisional and may still be revised.
- COOP-V2-017 - Correct: A - Correct Answer: confirmed the accuracy of - Explanation: Amir checked the calculations to confirm that they were accurate.
- COOP-V2-018 - Correct: D - Correct Answer: temperature - Explanation: A compass indicates direction, while a thermometer indicates temperature.
- COOP-V2-019 - Correct: D - Correct Answer: artist - Explanation: An author creates a manuscript, while an artist creates a sculpture.
- COOP-V2-020 - Correct: C - Correct Answer: dogs - Explanation: A hive houses bees, while a kennel houses dogs.

GRAMMAR ANSWERS

COOP-G2-011 - Correct: A - Correct Answer: The box of old photographs belongs on the top shelf. - Explanation: The singular subject "box" requires the singular verb "belongs."

COOP-G2-012 - Correct: B - Correct Answer: The musicians tuned their instruments before rehearsal. - Explanation: The plural pronoun "their" agrees with the plural antecedent "musicians."

COOP-G2-013 - Correct: D - Correct Answer: By the time the bus arrived, we had waited for twenty minutes. - Explanation: The past perfect "had waited" correctly marks the earlier past action.

COOP-G2-014 - Correct: B - Correct Answer: The coach spoke to Elena and me after practice. - Explanation: The preposition "to" requires the object pronoun "me."

COOP-G2-015 - Correct: C - Correct Answer: Dad asked, "Did you pack the flashlight?" - Explanation: A comma introduces the quotation, the first word is capitalized, and the question mark appears inside the quotation marks.

COOP-G2-016 - Correct: C - Correct Answer: The volunteers sorted the books, labeled the boxes, and cleared the tables. - Explanation: All three coordinated actions use matching past-tense verbs.

COOP-G2-017 - Correct: B - Correct Answer: Walking through the station, Luis was surprised by the announcement. - Explanation: The introductory phrase now directly modifies Luis, the person who was walking.

COOP-G2-018 - Correct: D - Correct Answer: We swept the bricks, measured the sunny areas, and washed the old pots. - Explanation: The three actions use parallel past-tense verbs: swept, measured, and washed.

COOP-G2-019 - Correct: A - Correct Answer: The basil and mint were assigned to different containers because mint spreads quickly. - Explanation: Naming "mint" removes the unclear pronoun reference.

COOP-G2-020 - Correct: C - Correct Answer: Mateo placed labels beside the seedlings; each label was written in waterproof ink. - Explanation: A semicolon correctly joins the two closely related independent clauses.

SPELLING ANSWERS

COOP-S2-011 - Correct: A - Correct Answer: maintenance - Explanation: "Maintenance" is the correct standard spelling.

COOP-S2-012 - Correct: C - Correct Answer: privilege - Explanation: "Privilege" is spelled with "lege" at the end.

COOP-S2-013 - Correct: D - Correct Answer: separate - Explanation: "Separate" is the correct standard spelling.

COOP-S2-014 - Correct: A - Correct Answer: embarrassed - Explanation: "Embarrassed" is misspelled; the correct spelling is "embarrassed."

COOP-S2-015 - Correct: B - Correct Answer: occasionally - Explanation: "Occasionally" is misspelled; the correct spelling is "occasionally."

COOP-S2-016 - Correct: A - Correct Answer: stationery - Explanation: "Stationery" refers to writing paper and related materials.

COOP-S2-017 - Correct: C - Correct Answer: principal - Explanation: A "principal" is the head of a school; a principle is a rule or belief.

COOP-S2-018 - Correct: B - Correct Answer: complement - Explanation: A "complement" is something that completes or goes well with something else.

COOP-S2-019 - Correct: D - Correct Answer: beginning - Explanation: Double the final consonant before adding "-ing" to form "beginning."

COOP-S2-020 - Correct: C - Correct Answer: reliable - Explanation: Change the final y to i before adding "-able" to form "reliable."

SECTION 2 - READING COMPREHENSION**Before the Oven Opens**

Stimulus ID: COOP-R2-S05 | Type: Literary Passage

At five o'clock, the bakery kitchen was quiet except for the hum of the refrigerator. Ana's first batch of rolls sat beneath a cloth, each piece shaped to the same careful size. According to the recipe, the dough should rise for forty minutes. The timer showed that only thirty-two had passed.

"They look ready," Ana said, reaching for the tray.

Her aunt Rosa did not answer immediately. She pressed one roll gently with a flour-dusted finger. The dent sprang back at once. "The clock offers one clue," she said. "The dough offers another."

Ana waited three more minutes and tested a different roll. This time, the dent returned slowly but still disappeared. A delivery truck rattled past the open window, and cool air swept across the counter. Ana worried that the draft would ruin the batch. She moved the tray away from the window but left the cloth in place.

When she tested the dough again, a shallow mark remained. The rolls had also developed a faint, warm scent. Ana slid them into the oven before the timer rang.

The finished rolls rose evenly, with crisp tops and soft centers. Rosa placed one in a basket without praising it. Instead, she reset the timer and asked, "Forty minutes next time?"

Ana shook her head. "Forty minutes is where I begin checking."

Rosa nodded. Ana understood that the recipe had not become less useful. It had become more useful because she now knew how to read it alongside the dough itself.

- A) Ana ignores a recipe and accidentally produces acceptable rolls.
- B) Ana learns to use timing, touch, and observation together when judging dough.
- C) Rosa repairs a kitchen timer before Ana begins baking.
- D) Ana discovers that cool air always improves rising dough.

Local Knowledge at the Harbor Entrance

Stimulus ID: COOP-R2-S06 | Type: Informational Passage

Large ships entering an unfamiliar harbor often take aboard a harbor pilot. Although the ship's captain remains responsible for the vessel, the pilot provides specialized knowledge of local waters. Harbor entrances may contain narrow channels, shifting sandbars, strong currents, crowded traffic, or turns that leave little room for error.

Before boarding, a pilot reviews information about the arriving ship, including its length, depth below the waterline, and ability to turn or stop. The pilot also considers tide, wind, visibility, and other vessel movements. A route safe for a small ferry may be unsuitable for a heavily loaded cargo ship.

Pilots usually reach an incoming vessel by a smaller boat and climb aboard while both vessels are moving slowly. On the bridge, the pilot communicates recommended headings and speeds. Tugboats or shore-based traffic controllers may also assist. Because each participant holds different information, clear communication is essential.

Electronic charts, radar, and satellite positioning have made navigation more precise, but they have not eliminated the value of local judgment. Instruments can show where a ship is, while an experienced pilot may anticipate how a crosscurrent behaves near a particular bend or how construction has changed traffic patterns. Harbor piloting therefore combines current technology with detailed knowledge developed through repeated experience in one place.

COOP-R2-026

Skill: Supporting Detail or Textual Evidence

Stimulus ID: COOP-R2-S06

Which information about an arriving ship does a pilot review before boarding?

- A) The number of passengers who have traveled before
- B) The price of the cargo being transported
- C) The date when the harbor was constructed
- D) The ship's length, depth, and maneuvering ability

COOP-R2-027

Skill: Supporting Detail or Textual Evidence

Stimulus ID: COOP-R2-S06

How does a harbor pilot usually reach an incoming vessel?

- A) By traveling alongside it in a smaller boat
- B) By swimming from a dock

Measuring with Shadows

Stimulus ID: COOP-G2-S03 | Type: Editing Passage

[1] Our class built simple sundials to investigate how shadows change. [2] Each groups measurements were taken at the same outdoor location. [3] We marked the tip of each shadow at 9:00 a.m., noon, and 3:00 p.m. [4] We measured each shadow's length, noted its direction, and photographs were taken. [5] The morning and afternoon shadows pointed in different directions. [6] This result showed that a sundial must remain in a fixed position to provide useful comparisons. [7] When we moved one model, its later marks no longer aligned with the earlier pattern.

ANSWER KEY + EXPLANATIONS

MATHEMATICS ANSWERS

- COOP-M2-021 - Correct: A - Correct Answer: 41 - Explanation: Seven-eighths of 64 is 56, and $56 - 15 = 41$.
- COOP-M2-022 - Correct: C - Correct Answer: 12 - Explanation: Since $72 = 2^3 \times 3^2$, it has $(3 + 1)(2 + 1) = 12$ positive factors.
- COOP-M2-023 - Correct: B - Correct Answer: 40 - Explanation: Multiplying both numbers by 100 gives $240 \div 6 = 40$.
- COOP-M2-024 - Correct: D - Correct Answer: 95 - Explanation: Each term is twice the preceding term plus 1, so $47 \times 2 + 1 = 95$.
- COOP-M2-025 - Correct: C - Correct Answer: 19 - Explanation: Expanding gives $3x - 10 = 2x + 9$, so $x = 19$.
- COOP-M2-026 - Correct: A - Correct Answer: 24 - Explanation: Eight ratio units represent 96 tickets, so each is 12; the two-unit difference equals 24 tickets.
- COOP-M2-027 - Correct: C - Correct Answer: 384 cm² - Explanation: The cube's edge is 8 centimeters because $8^3 = 512$; its surface area is $6 \times 8^2 = 384$ cm².
- COOP-M2-028 - Correct: B - Correct Answer: 63° - Explanation: Quadrilateral angles total 360°, and $360 - (88 + 97 + 112) = 63^\circ$.
- COOP-M2-029 - Correct: A - Correct Answer: 28 pints - Explanation: One gallon equals 8 pints, so $3.5 \times 8 = 28$ pints.
- COOP-M2-030 - Correct: D - Correct Answer: 9 - Explanation: The total must be 50, so $x = 16$; the ordered scores are 6, 8, 9, 11, 16, with median 9.

READING COMPREHENSION ANSWERS

- COOP-R2-021 - Correct: A - Correct Answer: She moves the tray away from the window. - Explanation: Ana responds to the cool draft by relocating the covered tray.
- COOP-R2-022 - Correct: B - Correct Answer: Good judgment combines instructions with attention to changing evidence. - Explanation: Ana begins with the recipe but also uses the dough's response, scent, and surrounding conditions.
- COOP-R2-023 - Correct: D - Correct Answer: She wants Ana to explain what she learned about judging readiness. - Explanation: Rosa's question prompts Ana to state that the suggested time is a starting point for observation.
- COOP-R2-024 - Correct: C - Correct Answer: a current of air - Explanation: The open window allows cool air to sweep across the counter, identifying the draft as moving air.
- COOP-R2-025 - Correct: B - Correct Answer: Ana learns to use timing, touch, and observation together when judging dough. - Explanation: This choice includes Ana's task, method, and central lesson without unnecessary details.
- COOP-R2-026 - Correct: D - Correct Answer: The ship's length, depth, and maneuvering ability - Explanation: The second paragraph lists these ship characteristics among the pilot's preboarding information.
- COOP-R2-027 - Correct: A - Correct Answer: By traveling alongside it in a smaller boat - Explanation: The passage states that pilots usually approach in a smaller boat and board while both vessels move slowly.
- COOP-R2-028 - Correct: B - Correct Answer: Harbor pilots combine local experience, ship information, and technology to guide vessels through difficult waters. - Explanation: This choice captures the pilot's knowledge, preparation, tools, and purpose across the entire passage.
- COOP-R2-029 - Correct: C - Correct Answer: Tides, wind, visibility, traffic, and sandbars can vary. - Explanation: The passage identifies changing environmental and traffic conditions that affect which route is suitable.
- COOP-R2-030 - Correct: D - Correct Answer: It defines a role, describes its tasks, and explains why it remains valuable. - Explanation: The paragraphs progress from the pilot's purpose to preparation, onboard work, and continuing importance.

- COOP-V2-025 - Correct: D - Correct Answer: superior - Explanation: Inferior means lower in quality or rank, while superior means higher.
- COOP-V2-026 - Correct: A - Correct Answer: extremely careful and honest - Explanation: Checking all records and reporting every error demonstrate scrupulous care and honesty.
- COOP-V2-027 - Correct: C - Correct Answer: gradually decreased - Explanation: The crowd became progressively smaller until only six people remained.
- COOP-V2-028 - Correct: D - Correct Answer: day - Explanation: Nocturnal activity occurs at night, while diurnal activity occurs during the day.
- COOP-V2-029 - Correct: B - Correct Answer: animal - Explanation: Sap circulates within a tree, just as blood circulates within an animal.
- COOP-V2-030 - Correct: A - Correct Answer: birds - Explanation: An aquarium is an enclosure for fish, while an aviary is an enclosure for birds.

GRAMMAR ANSWERS

COOP-G2-021 - Correct: C - Correct Answer: Several of the lanterns need new batteries. - Explanation: The plural pronoun "several" requires the plural verb "need."

COOP-G2-022 - Correct: A - Correct Answer: Both runners checked their shoelaces before the race. - Explanation: The plural pronoun "their" agrees with the plural antecedent "runners."

COOP-G2-023 - Correct: B - Correct Answer: The leaves had fallen before the first frost. - Explanation: The past participle "fallen" correctly follows the auxiliary verb "had."

COOP-G2-024 - Correct: D - Correct Answer: The final decision belongs to Marcus and her. - Explanation: The preposition "to" requires the object pronoun "her."

COOP-G2-025 - Correct: C - Correct Answer: Our guide said, "The eastern trail is closed today." - Explanation: A comma introduces the quotation, which begins with a capital letter and ends with punctuation inside the quotation marks.

COOP-G2-026 - Correct: D - Correct Answer: The internship requires arriving promptly, working carefully, and writing accurate reports. - Explanation: All three items use matching gerund phrases, creating parallel structure.

COOP-G2-027 - Correct: A - Correct Answer: The mechanic tightened the loose bolt with a socket wrench. - Explanation: Specific nouns and a precise verb clearly describe the action.

COOP-G2-028 - Correct: B - Correct Answer: The groups' measurements were taken at the same outdoor location. - Explanation: The apostrophe after plural "groups" correctly shows that the measurements belonged to multiple groups.

COOP-G2-029 - Correct: C - Correct Answer: We measured each shadow's length, noted its direction, and took photographs. - Explanation: The three coordinated actions use parallel past-tense verbs.

COOP-G2-030 - Correct: D - Correct Answer: After we moved one sundial, that sundial's later marks no longer aligned with its earlier pattern. - Explanation: Repeating "sundial" makes both references clear and removes the ambiguous pronoun.

SPELLING ANSWERS

COOP-S2-021 - Correct: A - Correct Answer: cemetery - Explanation: "Cemetery" is the correct standard spelling.

COOP-S2-022 - Correct: C - Correct Answer: supersede - Explanation: "Supersede" is correctly spelled with "sede" at the end.

COOP-S2-023 - Correct: B - Correct Answer: handkerchief - Explanation: "Handkerchief" is the correct standard spelling.

COOP-S2-024 - Correct: D - Correct Answer: broccoli - Explanation: "Broccoli" is misspelled; the correct spelling is "broccoli."

COOP-S2-025 - Correct: A - Correct Answer: vacuum - Explanation: "Vacuum" is misspelled; the correct spelling is "vacuum."

COOP-S2-026 - Correct: B - Correct Answer: truly - Explanation: "Truely" is misspelled; the correct spelling is "truly."

COOP-S2-027 - Correct: C - Correct Answer: palette - Explanation: A "palette" is the surface on which an artist mixes colors.

COOP-S2-028 - Correct: D - Correct Answer: waiver - Explanation: A "waiver" is a document that gives up a claim or acknowledges certain conditions.

COOP-S2-029 - Correct: A - Correct Answer: panicked - Explanation: Add k before "ed" to preserve the hard c sound in "panicked."

COOP-S2-030 - Correct: B - Correct Answer: hopeful - Explanation: Drop the final e from "hope" before adding the suffix "ful."

Title: The Crooked Joint

Text:

Ben had promised to build a small wooden stool for the spring exhibit. By Wednesday, four smooth legs and a square seat covered his workbench. Only one crosspiece refused to fit. A thin gap remained where it met the rear leg.

He spread extra glue into the gap and clamped the pieces together. From above, the stool looked finished. When he set it on the floor, however, one leg lifted each time he pressed the opposite corner.

Ms. Chen crouched beside it. Ben expected her to suggest a thicker coat of paint. Instead, she placed a ruler against the troublesome crosspiece. Its end had been cut at a slight angle.

"I can fill the space," Ben said.

"You can fill what you see," Ms. Chen replied. "Will that change how the pieces meet?"

Taking the stool apart meant softening the glue, cleaning the joint, and losing an afternoon of work. Ben stared at the polished seat, then reached for a damp cloth. Once the pieces separated, he marked a straight line, trimmed the crosspiece, and sanded its end. This time it met the leg evenly before he added any glue.

At the exhibit, visitors noticed the carved pattern on the seat, not the repaired joint beneath it. Ben did. When someone tested the stool, all four legs stayed firmly on the floor. The hidden correction felt more important than the decoration everyone praised.

Title: Gathering Water from Fog

Text:

Fog consists of tiny water droplets suspended near the ground. In some windy, foggy locations, those droplets can be collected with structures called fog nets. A typical collector stretches mesh between upright supports and places a channel beneath it.

As fog moves through the mesh, some droplets strike its fibers. Small droplets join to form larger drops, which gravity pulls downward into the channel. From there, the water flows into a storage tank. The mesh does not work like a solid wall. Open spaces allow air to pass through, while fibers provide surfaces on which droplets can gather.

Collector performance depends on more than the amount of fog. Wind must carry droplets toward the mesh, and the spacing and thickness of fibers affect how many drops strike them. A mesh that is too dense may push air around the collector. One that is too open may capture few droplets. Designers also consider slope, durability, and access for cleaning.

Fog water can support tree seedlings, gardens, or other local needs after it is collected and handled appropriately. However, output varies with weather and location, so a fog net is not a dependable replacement for every water source. Researchers test materials and compare collection rates over time before recommending a design. The technology is simple in appearance, but its success depends on matching a collector to local conditions.

Title: Mapping the Puddles

Text:

[1] After a heavy rain, our class mapped the puddles in the school courtyard. [2] The largest puddle formed beside the bicycle rack which stands at the lowest corner of the pavement. [3] We measured its depth and outlined its edges with removable chalk. [4] The next morning, the center remained wet, but the thinner edges had dried. [5] We also observed that leaves blocked a nearby drain. [6] Moving the leaves improved the flow of water. [7] However, our

map showed the school where water repeatedly collected and could help guide a longer-term repair.

ANSWER KEY + EXPLANATIONS

MATHEMATICS ANSWERS

COOP-M2-031 - Correct: B - Correct Answer: 1.125 - Explanation: Convert $1\frac{3}{4}$ to 1.75, then calculate $1.75 - 0.625 = 1.125$.

COOP-M2-032 - Correct: D - Correct Answer: 8 - Explanation: The digits of 847 total 19; adding 8 produces 855, whose digits total 18, a multiple of 9.

COOP-M2-033 - Correct: A - Correct Answer: 39 - Explanation: The middle odd integer is $111 \div 3 = 37$, so the greatest is 39.

COOP-M2-034 - Correct: C - Correct Answer: 31 - Explanation: The slope is $(19 - 7) \div (6 - 2) = 3$; increasing x by 4 again increases y by 12 to 31.

COOP-M2-035 - Correct: B - Correct Answer: 282.6 cm^3 - Explanation: Cylinder volume is $\pi r^2 h = 3.14 \times 3^2 \times 10 = 282.6$ cubic centimeters.

COOP-M2-036 - Correct: D - Correct Answer: 20 - Explanation: An octagon has $8(8 - 3) \div 2 = 20$ diagonals.

COOP-M2-037 - Correct: C - Correct Answer: 77°F - Explanation: Substitute 25 for C : $9/5 \times 25 + 32 = 45 + 32 = 77^\circ\text{F}$.

COOP-M2-038 - Correct: A - Correct Answer: 2,970 - Explanation: Two hours 45 minutes equals 165 minutes, and $165 \times 18 = 2,970$.

COOP-M2-039 - Correct: B - Correct Answer: 2.1 - Explanation: The weighted total is $2(1) + 5(2) + 3(3) = 21$; $21 \div 10 = 2.1$.

COOP-M2-040 - Correct: D - Correct Answer: $9/20$ - Explanation: Six numbers are divisible by 3 and four by 5, with 15 counted twice, so 9 of 20 qualify.

READING COMPREHENSION ANSWERS

COOP-R2-031 - Correct: A - Correct Answer: The crosspiece was cut at a slight angle. - Explanation: Ms. Chen uses the ruler to identify the angled end causing the poor joint.

COOP-R2-032 - Correct: C - Correct Answer: Correcting an underlying flaw matters more than concealing its appearance. - Explanation: Ben removes the hidden structural problem instead of merely filling the visible gap.

COOP-R2-033 - Correct: D - Correct Answer: He knows the repair will require time and undo work that looks finished. - Explanation: The passage emphasizes the cleaning, disassembly, and lost afternoon required to correct the joint.

COOP-R2-034 - Correct: B - Correct Answer: causing difficulty - Explanation: The crosspiece is troublesome because it does not fit correctly and makes the stool rock.

COOP-R2-035 - Correct: C - Correct Answer: Ben corrects a poorly cut joint and learns to value structural quality over appearances. - Explanation: This choice includes the construction problem, Ben's repair, and the lesson he learns.

COOP-R2-036 - Correct: A - Correct Answer: Gravity - Explanation: The passage states that gravity pulls enlarged drops downward into the channel.

COOP-R2-037 - Correct: B - Correct Answer: Fog nets can collect water, but effective designs must suit local airflow, weather, and practical needs. - Explanation: The passage explains both the collection process and the local factors that determine success.

COOP-R2-038 - Correct: D - Correct Answer: A single measurement may not represent changing weather and performance. - Explanation: Because output varies with conditions, measurements over time provide more dependable evidence.

COOP-R2-039 - Correct: C - Correct Answer: the amount of water produced - Explanation: "Output" refers to the water a fog net collects under changing conditions.

COOP-R2-040 - Correct: A - Correct Answer: It explains a collection process, examines design factors, and discusses uses and limitations. - Explanation: The paragraphs move from operation to design considerations and then to practical value and limits.

VOCABULARY ANSWERS

COOP-V2-031 - Correct: A - Correct Answer: adaptable - Explanation: Something versatile can be adapted for several different uses.

COOP-V2-032 - Correct: C - Correct Answer: faint - Explanation: A subtle feature is slight or difficult to notice, making “faint” the closest choice.

COOP-V2-033 - Correct: D - Correct Answer: welcoming - Explanation: Hostile means unfriendly or threatening, while welcoming expresses friendliness.

COOP-V2-034 - Correct: B - Correct Answer: abundant - Explanation: Meager means lacking in amount, while abundant means plentiful.

COOP-V2-035 - Correct: C - Correct Answer: decelerate - Explanation: To accelerate is to increase speed, while to decelerate is to reduce it.

COOP-V2-036 - Correct: A - Correct Answer: difficult and intimidating - Explanation: The slow climb and need for every handhold show that the ridge was challenging and intimidating.

COOP-V2-037 - Correct: C - Correct Answer: no longer in current use - Explanation: Replacement by newer models shows that the machine was obsolete.

COOP-V2-038 - Correct: D - Correct Answer: confirmed - Explanation: The witnesses support Mei’s account by independently reporting the same events.

COOP-V2-039 - Correct: B - Correct Answer: account - Explanation: A key provides access through a lock, while a password provides access to an account.

COOP-V2-040 - Correct: D - Correct Answer: sand - Explanation: A glacier is a mass of ice, while a dune is a mass of sand.

GRAMMAR ANSWERS

COOP-G2-031 - Correct: A - Correct Answer: The sound of distant bells reaches the valley at noon. - Explanation: The singular subject “sound” requires the singular verb “reaches.”

COOP-G2-032 - Correct: B - Correct Answer: The players stored their equipment after practice. - Explanation: The plural pronoun “their” agrees with the plural antecedent “players.”

COOP-G2-033 - Correct: C - Correct Answer: The river has frozen near the bank. - Explanation: The past participle “frozen” correctly follows the auxiliary verb “has.”

COOP-G2-034 - Correct: A - Correct Answer: She and I presented the findings together. - Explanation: The subject pronouns “she” and “I” correctly perform the action.

COOP-G2-035 - Correct: D - Correct Answer: We crossed the Hudson River before entering New York. - Explanation: Both words in the geographic name “Hudson River” and both words in “New York” are capitalized.

COOP-G2-036 - Correct: B - Correct Answer: When the power failed, the auditorium became dark. - Explanation: The dependent clause is correctly joined to an independent clause to form a complete sentence.

COOP-G2-037 - Correct: C - Correct Answer: After speaking with Jordan, Riley promised to bring the notes. - Explanation: Naming Riley as the subject clearly identifies who spoke and made the promise.

COOP-G2-038 - Correct: A - Correct Answer: The largest puddle formed beside the bicycle rack, which stands at the lowest corner of the pavement. - Explanation: A comma correctly introduces the nonessential clause beginning with “which.”

COOP-G2-039 - Correct: B - Correct Answer: When we moved the leaves that were blocking a nearby drain, the water flowed more freely. - Explanation: The revision combines the cause and result in one complete sentence without a misplaced modifier.

COOP-G2-040 - Correct: D - Correct Answer: In addition - Explanation: Sentence 7 adds another benefit of the observations rather than contrasting with the preceding information.
