Title: The Mark in the Sand

Text:

Layla's job at the community track meet was to record long-jump distances. After every jump, she checked the measuring tape, called out the result, and wrote it beside the athlete's number.

During the final round, a jumper named Devon landed farther than anyone had all afternoon. The crowd cheered when another volunteer announced a meet record. Layla looked down to enter the number, but the tape's zero mark no longer touched the takeoff line. Its metal end had shifted several inches into the sand.

"We can straighten it for the next jump," the volunteer whispered. "Everyone already heard the result."

Layla studied the rake marks. The tape had been in the correct place before Devon jumped, but someone smoothing the pit afterward must have moved it before the measurement was read. She could not tell exactly how far Devon had traveled.

Layla raised her hand to stop the announcement. The cheering faded as she explained the problem. Devon's smile disappeared, yet he asked for another attempt rather than arguing.

Before the jump, Layla and Devon checked the zero mark together. His second distance was slightly shorter than the announced record, but it was still the day's best.

As Layla wrote the official result, Devon thanked her. She had expected him to be disappointed. Instead, he tapped the number on her clipboard and said, "Now I know that one is mine."

Stimulus Type: Scientific Passage

Title: Guiding Snow with Fences

Text:

A snow fence is not designed to stop every snowflake like a solid wall. Instead, it changes the movement of wind. Most snow fences contain open spaces between boards or through mesh. As wind passes through those openings, it slows and becomes less able to carry drifting snow. The snow then settles mainly on the downwind side of the fence.

This effect can help keep snow from piling onto a road, railway, or building entrance. Placement is crucial. If a fence stands too close to the area being protected, the resulting drift may form exactly where it causes trouble. Designers estimate the likely length of the drift and position the fence far enough away.

Height and openness also matter. A taller fence can influence a larger area, while a completely solid barrier may create strong swirling air near its edges. The most effective design depends on typical wind direction, landscape, snowfall, and available space.

Snow fences may be made from wood, synthetic mesh, or even rows of shrubs. Living fences can serve additional purposes, such as providing habitat, but they take time to grow. Temporary fences can be moved as needs change. In every form, successful snow control depends on guiding wind and choosing a location based on observed conditions rather than simply placing a barrier beside the place that must remain clear.

## ANSWER KEY + EXPLANATIONS

### MATHEMATICS ANSWERS

COOP-M3-001 - Correct: A - Correct Answer: 7 - Explanation: Since  $7^2 = 49$  and  $8^2 = 64$ ,  $\sqrt{50}$  lies between 7 and 8.

COOP-M3-002 - Correct: B - Correct Answer: 63 - Explanation: Divide 28 by 4 and multiply by 9:  $28 \div 4 \times 9 = 63$ .

COOP-M3-003 - Correct: C - Correct Answer: 84 - Explanation: Evaluate the factors:  $2^2 \times 3 \times 7 = 4 \times 3 \times 7 = 84$ .

COOP-M3-004 - Correct: D - Correct Answer: 8.5 - Explanation: Expand to get  $4y - 7 = 2y + 10$ ; then  $2y = 17$ , so  $y = 8.5$ .

COOP-M3-005 - Correct: A - Correct Answer:  $y = 3x + 1$  - Explanation: Each increase of 1 in  $x$  raises  $y$  by 3, and substituting  $x = 1$  gives  $y = 4$ .

COOP-M3-006 - Correct: B - Correct Answer: 18 days - Explanation: Halving the number of equally productive painters doubles the completion time from 9 to 18 days.

COOP-M3-007 - Correct: C - Correct Answer:  $126 \text{ cm}^2$  - Explanation: Parallelogram area equals base  $\times$  perpendicular height, so  $14 \times 9 = 126 \text{ cm}^2$ .

COOP-M3-008 - Correct: D - Correct Answer: 13 inches - Explanation: The interior diagonal is  $\sqrt{(3^2 + 4^2 + 12^2)} = \sqrt{169} = 13$  inches.

COOP-M3-009 - Correct: A - Correct Answer: 7.5 grams - Explanation: One gram equals 1,000 milligrams, so  $7,500 \div 1,000 = 7.5$  grams.

COOP-M3-010 - Correct: B - Correct Answer:  $1/2$  - Explanation: Exactly one head occurs in HT or TH, two of the four equally likely outcomes.

#### READING COMPREHENSION ANSWERS

COOP-R3-001 - Correct: B - Correct Answer: The tape's zero mark had shifted into the sand. - Explanation: Layla sees that the tape no longer begins at the takeoff line.

COOP-R3-002 - Correct: C - Correct Answer: An honest result is more valuable than an impressive but uncertain one. - Explanation: Layla and Devon reject an unreliable record in favor of a valid measurement.

COOP-R3-003 - Correct: A - Correct Answer: The second measurement was obtained fairly and accurately. - Explanation: Devon values the result because he and Layla verified the tape before the second jump.

COOP-R3-004 - Correct: D - Correct Answer: gradually became quieter - Explanation: The crowd stops cheering as Layla raises her hand and explains the measurement problem.

COOP-R3-005 - Correct: C - Correct Answer: Layla questions an unreliable measurement, and Devon earns a valid result with another jump. - Explanation: This choice captures the measurement problem, Layla's response, and the outcome.

COOP-R3-006 - Correct: B - Correct Answer: On the downwind side - Explanation: Slower air releases drifting snow mainly on the downwind side of the fence.

COOP-R3-007 - Correct: A - Correct Answer: They can provide habitat. - Explanation: The fourth paragraph names habitat as an additional benefit of living fences.

COOP-R3-008 - Correct: C - Correct Answer: Snow fences manage drifting snow by altering wind, and their design and placement must match local conditions. - Explanation: This choice includes both the operating principle and the factors governing effective use.

COOP-R3-009 - Correct: D - Correct Answer: The downwind drift might form on the road itself. - Explanation: The passage warns that a nearby fence may deposit snow exactly where it causes trouble.

COOP-R3-010 - Correct: B - Correct Answer: By explaining how snow fences work, then examining placement, design, and material choices - Explanation: The passage progresses from airflow to location, dimensions, and possible materials.

#### VOCABULARY ANSWERS

COOP-V3-001 - Correct: C - Correct Answer: clear - Explanation: Lucid language or reasoning is clear and easy to understand.

COOP-V3-002 - Correct: D - Correct Answer: difficult - Explanation: An arduous task requires great effort and is difficult.

COOP-V3-003 - Correct: A - Correct Answer: refrain - Explanation: To abstain is to choose not to participate or partake.

COOP-V3-004 - Correct: B - Correct Answer: agitated - Explanation: Tranquil means calm, while agitated means disturbed or restless.

COOP-V3-005 - Correct: C - Correct Answer: counterfeit - Explanation: Genuine means authentic, while counterfeit means falsely made to appear authentic.

COOP-V3-006 - Correct: D - Correct Answer: reasonable and believable - Explanation: Matching known facts makes the explanation reasonable, though not yet proven.

COOP-V3-007 - Correct: A - Correct Answer: firmly determined - Explanation: Continuing despite delays and refusing to quit show firm determination.

COOP-V3-008 - Correct: C - Correct Answer: lacking organization - Explanation: The absence of any ordering system shows that the stacking was haphazard.

COOP-V3-009 - Correct: B - Correct Answer: limb - Explanation: A hinge allows a door to bend at a connection, as a joint allows a limb to bend.

COOP-V3-010 - Correct: D - Correct Answer: exhibition - Explanation: An editor organizes material for a publication, while a curator organizes material for an exhibition.

#### GRAMMAR ANSWERS

COOP-G3-001 - Correct: A - Correct Answer: The collection of miniature boats belongs to the museum. - Explanation: The singular subject “collection” requires the singular verb “belongs.”

COOP-G3-002 - Correct: B - Correct Answer: Several volunteers brought their own gloves. - Explanation: The plural pronoun “their” agrees with the plural antecedent “volunteers.”

COOP-G3-003 - Correct: C - Correct Answer: We had driven beyond the entrance. - Explanation: The past participle “driven” correctly follows the auxiliary verb “had.”

COOP-G3-004 - Correct: D - Correct Answer: The invitation was addressed to Elena and me. - Explanation: The preposition “to” requires the object pronoun “me.”

COOP-G3-005 - Correct: A - Correct Answer: The three chefs' schedules were posted near the kitchen. - Explanation: The apostrophe after plural “chefs” shows that the schedules belong to all three chefs.

COOP-G3-006 - Correct: D - Correct Answer: The path was muddy; nevertheless, we continued hiking. - Explanation: A semicolon separates the independent clauses, and a comma follows the conjunctive adverb.

COOP-G3-007 - Correct: B - Correct Answer: The outcome surprised everyone. - Explanation: The revision removes redundant expressions while preserving the complete meaning.

COOP-G3-008 - Correct: C - Correct Answer: For this reason - Explanation: Labeling follows logically from the need to distinguish differently prepared samples.

COOP-G3-009 - Correct: A - Correct Answer: The liquid gradually turned amber, so we removed the skins with a strainer. - Explanation: A comma and coordinating conjunction correctly join the independent clauses.

**SECTION 2 - READING COMPREHENSION****The Second Label**

Stimulus ID: COOP-R3-S03 | Type: Literary Passage

Luca was preparing a display for the school museum when he found two labels for the same brass tool. One card, written decades earlier, called it a candle mold. A newer inventory sheet described it as a device for shaping soap.

The display opened on Monday. Luca could have selected the newer label and discarded the older one, but the disagreement bothered him. He examined the tool again. Its narrow metal tubes could have held wax, yet a faint floral scent remained inside the wooden frame.

In the museum office, Luca found a notebook donated with the tool. The first pages described winter evenings when a

family made candles for its farmhouse. Years later, the same family began producing small bars of scented soap to sell at a market. A sketch showed the brass tubes being lined with paper before the soap mixture was poured.

Luca replaced both labels with a longer card. It explained that the object had begun as a candle mold and was later adapted for soap. He placed copies of the two original descriptions beside the notebook sketch.

On opening day, visitors spent more time at the tool than at several larger objects. They debated which use seemed more surprising and studied the scratches that both activities had left. Luca had worried that conflicting labels would weaken the display. Instead, the corrected label revealed a story of change that a single description would have hidden.

### **COOP-R3-011**

Skill: Supporting Detail or Textual Evidence

Stimulus ID: COOP-R3-S03

What evidence suggests that the tool had been used for soap?

- A) The brass tubes were completely smooth.
- B) A faint floral scent remained inside the wooden frame.
- C) The inventory sheet contained a drawing of candles.
- D) The tool was displayed beside a farmhouse photograph.

### **COOP-R3-012**

Which idea is best developed by Luca's investigation?

- A) Older records should always be discarded in favor of newer ones.
- B) Museum visitors prefer large objects to small tools.
- C) Conflicting information can lead to a fuller account when it is carefully examined.
- D) A label is useful only when it gives one brief description.

### **COOP-R3-013**

Skill: Inference

Stimulus ID: COOP-R3-S03

Why does Luca display the two original descriptions beside the new label?

- A) He wants visitors to see the evidence that led to the revised explanation.
- B) He cannot decide which old card has better handwriting.
- C) He plans to let visitors vote on the correct use.
- D) He wants to hide the notebook sketch from the public.

### **COOP-R3-014**

Skill: Vocabulary in Context

Stimulus ID: COOP-R3-S03

- A) Luca replaces a damaged museum tool with a newly manufactured copy.
- B) Visitors object to a display because it contains too many written labels.
- C) A family stops making candles after losing its brass mold at a market.
- D) Luca resolves two conflicting museum labels and discovers that one tool served different purposes over time.

## **Why Cities Build Rain Gardens**

Stimulus ID: COOP-R3-S04 | Type: Informational Passage

During a heavy rain, water runs from roofs, sidewalks, and parking lots into storm drains. This runoff can carry soil, oil, litter, and other materials toward streams. When a large amount of water reaches a drainage system at once, streets may also flood.

A rain garden is a shallow planted area designed to collect some of that runoff. It is often placed lower than the surrounding ground so water can flow into it. Layers of soil and gravel allow the water to soak downward gradually. Plant roots help keep the soil open and may trap some materials carried by the water.

The plants in a rain garden must tolerate changing conditions. After a storm, the garden may be temporarily wet. During dry weather, the same area may receive little water. Native grasses, flowers, and shrubs are often selected because they can survive local weather and provide food or shelter for insects and birds.

A rain garden is not intended to remain a pond. Designers consider how quickly the soil drains and avoid locations where water could threaten a building's foundation. Leaves and litter must be removed, and damaged plants may need replacement. With suitable placement and maintenance, a rain garden can reduce the speed and amount of runoff entering drains while adding green space to a neighborhood.

### **COOP-R3-016**

Skill: Supporting Detail or Textual Evidence

Stimulus ID: COOP-R3-S04

What allows water in a rain garden to soak downward gradually?

- A) Layers of soil and gravel

Title: The Quietest Booth

Text:

Nia's science-fair project compared three materials used to soften echoes. She lined identical cardboard booths with felt, cork, or folded paper, then played the same recorded tone inside each one. Her sound meter showed that the cork booth was quietest.

During the morning judging period, the numbers changed. Now the felt booth appeared to perform best. Nia checked the lining and replayed the tone, but the second result remained.

Her partner Owen pointed toward a ventilation fan that had started above their table. Its low hum was barely noticeable in the crowded room. Nia moved the meter closer to the fan, and the reading rose.

They could have reported the quieter measurements collected before the fair. Instead, Nia wrote "background sound not controlled" across the results page. She and Owen asked to use an empty classroom during lunch. There, they placed every booth the same distance from the meter and repeated each test four times. Cork again produced the lowest average reading, although the difference was smaller than their first data suggested.

When the judges returned, Nia began by describing the fan rather than the winning material. One judge asked whether discovering the interference had weakened the project.

Nia glanced at the crossed-out chart. "It weakened our first conclusion," she said, "but it strengthened the way we tested it."

The judge nodded and spent the remaining time examining their revised procedure.

Title: An Image Made by Heat

Text:

Many receipts are printed on thermal paper, which can create dark marks without liquid ink. The paper contains a coating with color-forming chemicals that remain mostly colorless at ordinary temperatures. Inside a thermal printer, tiny heating elements touch selected points as the paper moves past. Heat triggers a reaction in the coating, producing letters, numbers, and images.

Because the printer does not need ink cartridges or ribbons, its mechanism can be compact and require relatively little routine maintenance. It can also print quickly and quietly. These advantages make thermal printing useful for receipts, labels, and tickets.

The same sensitivity that allows the paper to form an image can also cause problems. Prolonged heat or strong sunlight may darken areas that were not originally printed. Oils, plasticizers, and some cleaning substances can damage the coating or make the image fade. Friction may create marks as well.

For this reason, an important thermal receipt should be stored away from heat, bright light, and reactive materials. Even with careful storage, the image may not last as long as ink on durable paper. A digital copy can preserve information that might later fade. Thermal paper is therefore convenient for fast, short-term records, but it is less suitable when a document must remain readable for many years.

ANSWER KEY + EXPLANATIONS

MATHEMATICS ANSWERS

COOP-M3-021 - Correct: A - Correct Answer: 11 - Explanation: Evaluate the absolute value and exponent first:  $6 - 4 + 9 = 11$ .

COOP-M3-022 - Correct: C - Correct Answer: 7 - Explanation: The qualifying multiples are 56, 63, 70, 77, 84, 91, and 98.

COOP-M3-023 - Correct: B - Correct Answer: 3 - Explanation: Convert to improper fractions:  $\frac{8}{3} \times \frac{9}{8} = 3$ .

COOP-M3-024 - Correct: D - Correct Answer: 30 - Explanation: Substitute 5 for x:  $5^2 + 5 = 25 + 5 = 30$ .

COOP-M3-025 - Correct: C - Correct Answer:  $x \leq -3$  - Explanation: Subtract 3 to get  $-5x \geq 15$ ; dividing by  $-5$  reverses the inequality.

COOP-M3-026 - Correct: A - Correct Answer: 36 - Explanation: Three ratio units equal 27, so each unit is 9 and the smaller number is  $4 \times 9 = 36$ .

COOP-M3-027 - Correct: C - Correct Answer:  $240 \text{ cm}^3$  - Explanation: Prism volume equals base area  $\times$  length, so  $24 \times 10 = 240 \text{ cm}^3$ .

COOP-M3-028 - Correct: B - Correct Answer: (1, 2) - Explanation: Average corresponding coordinates:  $(-5 + 7)/2 = 1$  and  $(8 - 4)/2 = 2$ .

COOP-M3-029 - Correct: A - Correct Answer: 5,400 meters - Explanation: One kilometer equals 1,000 meters, so  $5.4 \times 1,000 = 5,400$ .

COOP-M3-030 - Correct: D - Correct Answer:  $16 \frac{5}{6}$  - Explanation: The original total is  $7 \times 18 = 126$ ; after removing 25, divide 101 by 6.

#### READING COMPREHENSION ANSWERS

COOP-R3-021 - Correct: B - Correct Answer: A ventilation fan - Explanation: Owen notices the fan's low hum above their table.

COOP-R3-022 - Correct: C - Correct Answer: Recognizing and correcting a weakness can improve an investigation. - Explanation: Nia controls the background sound and repeats the tests to strengthen the method.

COOP-R3-023 - Correct: A - Correct Answer: Nia's response shows that she understands how evidence and methods affect a conclusion. - Explanation: Her answer distinguishes a weaker initial claim from a stronger revised procedure.

COOP-R3-024 - Correct: D - Correct Answer: an outside influence that disturbs a result - Explanation: The fan's hum changes the meter readings and interferes with the comparison.

COOP-R3-025 - Correct: B - Correct Answer: They identify uncontrolled sound, repeat their tests more carefully, and present a more reliable conclusion. - Explanation: This choice captures the problem, response, and improved outcome.

COOP-R3-026 - Correct: A - Correct Answer: Tiny heating elements - Explanation: Heating elements touch selected points and trigger the color-forming reaction.

COOP-R3-027 - Correct: C - Correct Answer: Prolonged heat or strong sunlight - Explanation: The third paragraph identifies both conditions as causes of unwanted darkening.

COOP-R3-028 - Correct: D - Correct Answer: It enables fast inkless printing, but its images can be vulnerable to damage and fading. - Explanation: This choice states both thermal paper's practical advantage and its principal limitation.

COOP-R3-029 - Correct: B - Correct Answer: It preserves information if the physical image becomes unreadable. - Explanation: A digital copy remains available if the heat-sensitive image fades or darkens.

COOP-R3-030 - Correct: D - Correct Answer: It explains a process, presents advantages and weaknesses, and offers storage guidance. - Explanation: The passage moves from image formation to benefits, risks, and preservation advice.

#### VOCABULARY ANSWERS

COOP-V3-021 - Correct: A - Correct Answer: watchful - Explanation: A vigilant person remains alert and watchful.

COOP-V3-022 - Correct: B - Correct Answer: cure - Explanation: A remedy is something used to correct or cure a problem.

COOP-V3-023 - Correct: C - Correct Answer: begin - Explanation: To commence an activity is to begin it.

COOP-V3-024 - Correct: D - Correct Answer: arrogant - Explanation: Humble means modest, while arrogant means overly proud.

COOP-V3-025 - Correct: A - Correct Answer: varied - Explanation: Uniform means consistent or alike, while varied means showing differences.

COOP-V3-026 - Correct: B - Correct Answer: possible to carry out - Explanation: Available resources show that the plan can realistically be completed.

COOP-V3-027 - Correct: C - Correct Answer: not moving - Explanation: The lack of a breeze shows that the air was still and stagnant.

COOP-V3-028 - Correct: D - Correct Answer: writer - Explanation: A fingerprint can identify a person, while a signature can identify its writer.

COOP-V3-029 - Correct: A - Correct Answer: fire - Explanation: An antidote counteracts poison, while an extinguisher counteracts fire.

COOP-V3-030 - Correct: B - Correct Answer: metalwork - Explanation: A kiln is used to produce pottery, while a forge is used to produce metalwork.

#### GRAMMAR ANSWERS

COOP-G3-021 - Correct: C - Correct Answer: The stack of folded blankets is in the closet. - Explanation: The singular subject "stack" requires the singular verb "is."

COOP-G3-022 - Correct: A - Correct Answer: Both speakers reviewed their notes. - Explanation: The plural pronoun "their" agrees with the plural antecedent "speakers."

COOP-G3-023 - Correct: B - Correct Answer: The bell had rung before noon. - Explanation: The past participle "rung" correctly follows the auxiliary verb "had."

COOP-G3-024 - Correct: D - Correct Answer: The guide spoke to Tariq and me. - Explanation: The preposition "to" requires the object pronoun "me."

COOP-G3-025 - Correct: C - Correct Answer: Please bring three supplies: a pencil, an eraser, and a ruler. - Explanation: A colon correctly introduces a list after a complete independent clause.

COOP-G3-026 - Correct: D - Correct Answer: Talia carried the vase wrapped in newspaper. - Explanation: Placing the phrase beside "vase" clearly shows what was wrapped.

COOP-G3-027 - Correct: A - Correct Answer: The twins wore matching shirts. - Explanation: The revision removes redundant references to two twins and shirts being alike.

COOP-G3-028 - Correct: C - Correct Answer: Another group planned six servings; therefore, it used three cups. - Explanation: A semicolon precedes the conjunctive adverb, and a comma follows it.

COOP-G3-029 - Correct: B - Correct Answer: The original recipe served four people, and it required two cups of broth. - Explanation: A comma and coordinating conjunction correctly join the independent clauses.

COOP-G3-030 - Correct: D - Correct Answer: Accurate measurements were important; the flavor also depended on keeping the ingredient balance consistent. - Explanation: A semicolon correctly joins the two related independent clauses.

#### SPELLING ANSWERS

COOP-S3-021 - Correct: A - Correct Answer: miscellaneous - Explanation: "Miscellaneous" is the correct standard spelling.

COOP-S3-022 - Correct: B - Correct Answer: embroidery - Explanation: "Embroidery" is the correct standard spelling.

COOP-S3-023 - Correct: C - Correct Answer: acknowledge - Explanation: "Acknowledge" is the correct standard spelling.

COOP-S3-024 - Correct: D - Correct Answer: gaurdian - Explanation: "Gaurdian" is misspelled; the correct spelling is "guardian."

COOP-S3-025 - Correct: A - Correct Answer: wierd - Explanation: "Wierd" is misspelled; the correct spelling is "weird."

COOP-S3-026 - Correct: B - Correct Answer: comming - Explanation: "Comming" is misspelled; the correct spelling is "coming."

COOP-S3-027 - Correct: C - Correct Answer: canvas - Explanation: "Canvas" is the heavy fabric used as a painting surface; "canvass" is a different word.

COOP-S3-028 - Correct: D - Correct Answer: medal - Explanation: A "medal" is an award, while "meddle" means to interfere.

COOP-S3-029 - Correct: A - Correct Answer: courageous - Explanation: Drop the final e from "courage" before adding "ous."

COOP-S3-030 - Correct: B - Correct Answer: studious - Explanation: Change the final y in "study" to i before adding "ous."

Title: Thirty Seconds of Air

Text:

Imani had prepared twelve questions for her first turn hosting the community radio program. Her guest, Mr. Dorsey, repaired clocks and had promised to explain how he began the work.

The red studio light came on. Imani welcomed listeners and asked her opening question. Mr. Dorsey leaned toward the microphone, but no words followed. Through the glass, the producer pointed urgently at the clock.

Imani glanced at her list. Every question seemed too large: Why had he chosen his career? What made a clock worth saving? She heard the quiet seconds stretching.

Then she noticed a tiny brass gear beside Mr. Dorsey's hand. "What clock did that come from?" she asked.

Mr. Dorsey looked down and smiled. The gear belonged to the first clock he had repaired, a kitchen clock that his grandmother refused to discard. As he described searching for the fault, he forgot to watch the studio light. Imani asked how he knew which part had failed, and the conversation began to flow.

Afterward, the producer praised Imani for filling the silence. She shook her head. "I stopped trying to fill it," she said. "I looked for something he was ready to talk about."

On her list, Imani crossed out three broad questions. Beside the others, she wrote a reminder: begin with what is present, then follow the answer.

Title: A Metal That Protects Another

Text:

When iron or steel is exposed to water and oxygen, chemical reactions can produce rust. Paint and other coatings slow corrosion by separating metal from its surroundings, but a scratch may leave the surface vulnerable. Another protection method uses a more reactive metal.

Zinc, magnesium, or aluminum can be electrically connected to the steel that must be protected. Because the attached metal reacts more readily, it corrodes first. It is often called a sacrificial anode because it is gradually consumed while helping preserve the steel.

This method is used on structures that are difficult to keep perfectly coated, including ship hulls, underground pipelines, and some water heaters. The protective metal must make good electrical contact with the steel, and the surrounding water or damp soil helps complete the electrochemical process.

A sacrificial anode does not last forever. Workers inspect it and replace it after too much material has been consumed. The amount and placement of protective metal must also suit the structure and environment. A small anode may be exhausted too quickly, while poor contact may prevent it from working effectively. The method succeeds not by stopping every chemical reaction, but by directing the more damaging corrosion away from an important structure and toward a replaceable material.

Title: Storing Flashlight Batteries

Text:

[1] Our safety club compared two ways of storing flashlight batteries for several weeks. [2] We placed one set in a warm cabinet and another in a cool dry drawer. [3] Every Friday, we measured each sets remaining voltage. [4] The batteries in the cooler location retained more of their charge. [5] The cabinet was beside a heating vent, the drawer was across the room. [6] Therefore, our observations suggested that storage conditions can affect battery

## ANSWER KEY + EXPLANATIONS

### MATHEMATICS ANSWERS

COOP-M3-031 - Correct: D - Correct Answer:  $\frac{3}{10}$  - Explanation: Multiply by the reciprocal:  
 $\frac{5}{12} \times \frac{18}{25} = \frac{90}{300} = \frac{3}{10}$ .

COOP-M3-032 - Correct: B - Correct Answer: 1 - Explanation: Since 4 leaves remainder 1 when divided by 3, every positive power of 4 also leaves remainder 1.

COOP-M3-033 - Correct: A - Correct Answer: 25 - Explanation: Adding the equations gives twice the greater number as 50, so the greater number is 25.

COOP-M3-034 - Correct: C - Correct Answer: -3 - Explanation: The slope is  $(-7 - 5) \div (3 - (-1)) = -12 \div 4 = -3$ .

COOP-M3-035 - Correct: D - Correct Answer:  $150.72 \text{ cm}^3$  - Explanation: Substitute into the formula:  $\frac{1}{3} \times 3.14 \times 4^2 \times 9 = 150.72 \text{ cm}^3$ .

COOP-M3-036 - Correct: B - Correct Answer:  $120 \text{ cm}^2$  - Explanation: Rhombus area is one-half the product of the diagonals:  $\frac{1}{2} \times 10 \times 24 = 120 \text{ cm}^2$ .

COOP-M3-037 - Correct: C - Correct Answer: 1 hour 15 minutes - Explanation: The decimal 0.25 hour equals  $0.25 \times 60 = 15$  minutes.

COOP-M3-038 - Correct: A - Correct Answer: 320 fluid ounces - Explanation: Multiply 2.5 gallons by 128 fluid ounces per gallon to obtain 320.

COOP-M3-039 - Correct: B - Correct Answer: 3 - Explanation: Ten ratings are recorded, and the fifth and sixth values are both 3.

COOP-M3-040 - Correct: D - Correct Answer:  $\frac{1}{5}$  - Explanation: The independent probabilities are  $\frac{2}{5}$  and  $\frac{3}{6}$ , so  $\frac{2}{5} \times \frac{1}{2} = \frac{1}{5}$ .

#### READING COMPREHENSION ANSWERS

COOP-R3-031 - Correct: C - Correct Answer: A tiny brass gear - Explanation: Imani notices the gear beside Mr. Dorsey's hand and asks where it came from.

COOP-R3-032 - Correct: A - Correct Answer: Attentive listening can be more useful than rigidly following a prepared plan. - Explanation: Imani succeeds by observing her guest and following his answer instead of forcing broad questions.

COOP-R3-033 - Correct: D - Correct Answer: The familiar object leads him to a specific, meaningful memory. - Explanation: The gear prompts Mr. Dorsey to describe his first repair and his grandmother's clock.

COOP-R3-034 - Correct: B - Correct Answer: proceed smoothly - Explanation: After the specific question, Mr. Dorsey speaks easily and the interview continues naturally.

COOP-R3-035 - Correct: C - Correct Answer: Imani uses a specific observation to help a hesitant guest speak and learns to follow his responses. - Explanation: This choice captures the interview problem, Imani's solution, and her lesson.

COOP-R3-036 - Correct: A - Correct Answer: Zinc, magnesium, or aluminum - Explanation: The second paragraph lists these reactive metals as possible sacrificial anodes.

COOP-R3-037 - Correct: B - Correct Answer: A more reactive, replaceable metal can corrode in place of a protected steel structure. - Explanation: The attached metal reacts first and directs corrosion away from the steel.

COOP-R3-038 - Correct: C - Correct Answer: It may be consumed until it can no longer provide enough protection. - Explanation: The anode gradually corrodes and must be replaced after too much material is lost.

COOP-R3-039 - Correct: D - Correct Answer: open to damage - Explanation: A scratch exposes the metal, leaving it open to corrosion damage.

COOP-R3-040 - Correct: A - Correct Answer: It introduces a corrosion problem, explains a protective method, and describes its uses and maintenance. - Explanation: The passage moves from rust to sacrificial protection and then to applications, inspection, and replacement.
