Title: Two Blue Threads

Text:

Mira's backpack strap tore the evening before a field trip. The bag was new, and she wanted the repair to disappear. Her uncle offered two spools of thread. One matched the bright blue fabric exactly. The other was a darker blue and much thicker.

Mira chose the matching thread. She made tiny stitches and admired how little they showed. When she placed two books inside, however, the thread snapped.

Her uncle examined the torn edge. "What job must the thread do?" he asked.

"Look right," Mira answered, then glanced at the books on the floor.

She removed the broken stitches and chose the thicker thread. This time she sewed farther beyond each side of the tear and made a second row of stitches. The dark lines were obvious, so Mira added the same double row to the unbroken strap. Now the two straps looked intentionally alike.

At the meeting point the next morning, a classmate asked where she had bought the backpack with the striped straps. Mira began to explain the accident, but the bus arrived. She lifted the bag by one strap. The seam held.

During the trip, Mira stopped thinking about whether anyone could see the repair. The visible stitches no longer seemed like evidence that the backpack had failed. They showed that she had understood what the repair needed to accomplish.

Stimulus Type: Scientific Passage

Title: Sharing the Load in an Elevator

Text:

An elevator car does not usually rise and fall by itself on the end of a cable. Many systems connect the car to a counterweight on the opposite side of a pulley. When the car rises, the counterweight descends; when the car descends, the counterweight rises.

The counterweight commonly balances the empty car plus part of its expected passenger load. Because the two sides are closer in weight, the motor does not need to lift the full mass of a loaded car from rest. Instead, it mainly overcomes the difference between the sides, along with friction and other resistance.

A counterweight does not make travel energy-free. The motor must still control acceleration, maintain the desired speed, and stop the car accurately at each floor. The load also changes as passengers enter and leave. Brakes and control systems are essential for safe operation.

Balancing offers another advantage: the motor and related equipment can often be smaller than they would be in a system that lifted the car's entire weight directly. Engineers must select cables, pulleys, motors, and counterweights for the building's height and intended loads. The counterweight is therefore one part of a coordinated system, reducing the work required while controls manage changing conditions.

Title: A Window Herb Garden

Text:

[1] Our class planted basil, mint, and parsley in containers beside a sunny window, and we labeled every container with the plant's name. [2] Each plant received the same amount of soil but the containers had different shapes. [3] We measured the plants every Monday and recorded their heights. [4] The mint grew rapidly. However, the parsley developed more slowly. [5] We rotated the containers so every plant would receive light from several directions. [6] Careful records helped us notice changes that were difficult to see from one day to the next.

ANSWER KEY + EXPLANATIONS

MATHEMATICS ANSWERS

COOP-M4-001 - Correct: A - Correct Answer: $4\frac{3}{8}$ - Explanation: Convert 2.75 to $2\frac{3}{4}$; then $2\frac{3}{4} + 1\frac{5}{8} = 4\frac{3}{8}$.

COOP-M4-002 - Correct: B - Correct Answer: 81 - Explanation: Convert 18% to 0.18 and calculate $0.18 \times 450 = 81$.

COOP-M4-003 - Correct: C - Correct Answer: 140 - Explanation: The least number containing all prime factors of 14, 20, and 35 is $2^2 \times 5 \times 7 = 140$.

COOP-M4-004 - Correct: D - Correct Answer: 11 - Explanation: Expand to get $6x - 12 = 4x + 10$; then $2x = 22$ and $x = 11$.

COOP-M4-005 - Correct: A - Correct Answer: 13 - Explanation: Substitute -4: $5 - 2(-4) = 5 + 8 = 13$.

COOP-M4-006 - Correct: B - Correct Answer: 308 - Explanation: Each box holds $196 \div 7 = 28$ notebooks, and $28 \times 11 = 308$.

COOP-M4-007 - Correct: C - Correct Answer: 100.48 cm^2 - Explanation: Semicircle area is $\frac{1}{2} \times 3.14 \times 8^2 = 100.48 \text{ cm}^2$.

COOP-M4-008 - Correct: D - Correct Answer: 15 feet - Explanation: The missing leg is $\sqrt{(17^2 - 8^2)} = \sqrt{225} = 15$ feet.

COOP-M4-009 - Correct: A - Correct Answer: 3.65 kilograms - Explanation: Divide 3,650 grams by 1,000 to obtain 3.65 kilograms.

COOP-M4-010 - Correct: B - Correct Answer: 1 - Explanation: The mean is 18 and the median is 17, so their difference is 1.

READING COMPREHENSION ANSWERS

COOP-R4-001 - Correct: A - Correct Answer: It matches the backpack's color. - Explanation: Mira wants the repair to disappear, so she initially chooses the exact color match.

COOP-R4-002 - Correct: B - Correct Answer: A useful solution must satisfy the problem's real demands. - Explanation: The successful repair prioritizes strength while still becoming an intentional design.

COOP-R4-003 - Correct: C - Correct Answer: She turns the visible repair into a deliberate design. - Explanation: Repeating the dark stitches makes both straps look intentionally striped.

COOP-R4-004 - Correct: D - Correct Answer: remained secure - Explanation: The strap supports the backpack, showing that the repaired seam remained secure.

COOP-R4-005 - Correct: C - Correct Answer: Mira replaces an invisible weak repair with a visible strong one and changes how she views it. - Explanation: This choice includes the failed repair, stronger solution, and changed perspective.

COOP-R4-006 - Correct: A - Correct Answer: It descends. - Explanation: The counterweight moves in the opposite direction from the elevator car.

COOP-R4-007 - Correct: B - Correct Answer: Acceleration, speed, and accurate stopping - Explanation: The third paragraph identifies these functions as continuing responsibilities of the motor and controls.

COOP-R4-008 - Correct: C - Correct Answer: Counterweights reduce the motor's required work, but safe movement still depends on coordinated machinery and controls. - Explanation: This choice captures both the balancing benefit and the need for a complete control system.

COOP-R4-009 - Correct: D - Correct Answer: Passenger loads vary as people enter and leave. - Explanation: A partial expected load offers useful balance despite changing passenger weight.

COOP-R4-010 - Correct: B - Correct Answer: A mechanism is introduced, its benefit is explained, and its limits and design needs are discussed. - Explanation: The passage progresses from operation to efficiency, control requirements, and system design.

VOCABULARY ANSWERS

COOP-V4-001 - Correct: A - Correct Answer: clever - Explanation: Astute means perceptive, clever, and capable of sound judgment.

COOP-V4-002 - Correct: B - Correct Answer: refill - Explanation: To replenish something is to fill or supply it again.

COOP-V4-003 - Correct: C - Correct Answer: complex - Explanation: Intricate describes something containing many connected details and therefore complex.

COOP-V4-004 - Correct: D - Correct Answer: warm - Explanation: Frigid means extremely cold, while warm expresses the opposite temperature.

COOP-V4-005 - Correct: A - Correct Answer: optional - Explanation: Mandatory means required, while optional means not required.

COOP-V4-006 - Correct: B - Correct Answer: logically organized - Explanation: Connected points that follow logically form a coherent explanation.

COOP-V4-007 - Correct: C - Correct Answer: front exterior - Explanation: A facade is the front exterior face of a building.

COOP-V4-008 - Correct: D - Correct Answer: find a way around - Explanation: The alternate route allows the hikers to avoid and go around the flooded crossing.

COOP-V4-009 - Correct: C - Correct Answer: vehicle - Explanation: An orbit is a path followed by a planet, while a route is a path followed by a vehicle.

COOP-V4-010 - Correct: D - Correct Answer: rhythm - Explanation: A compass guides navigation, while a metronome guides rhythm.

GRAMMAR ANSWERS

COOP-G4-001 - Correct: A - Correct Answer: Every one of the windows needs cleaning. - Explanation: The singular subject “one” requires the singular verb “needs.”

COOP-G4-002 - Correct: B - Correct Answer: The actors stored their costumes backstage. - Explanation: The plural pronoun “their” agrees with the plural antecedent “actors.”

COOP-G4-003 - Correct: C - Correct Answer: The birds have flown south. - Explanation: The past participle “flown” correctly follows the auxiliary verb “have.”

COOP-G4-004 - Correct: D - Correct Answer: The librarian helped Rosa and me. - Explanation: The object pronoun “me” correctly follows the verb “helped.”

COOP-G4-005 - Correct: A - Correct Answer: We visited Yellowstone National Park in July. - Explanation: All words in the proper place name and the month are correctly capitalized.

COOP-G4-006 - Correct: D - Correct Answer: The package arrived before the office opened. - Explanation: This option contains a subject, predicate, and complete thought.

COOP-G4-007 - Correct: B - Correct Answer: We changed routes because the road was closed. - Explanation: The sentence states the cause directly without redundant wording.

COOP-G4-008 - Correct: C - Correct Answer: in contrast - Explanation: The transition clearly contrasts the mint's rapid growth with the parsley's slower growth.

COOP-G4-009 - Correct: A - Correct Answer: Each plant received the same amount of soil, but the containers had different shapes. - Explanation: A comma and coordinating conjunction correctly join the independent clauses.

COOP-G4-010 - Correct: D - Correct Answer: The mint grew rapidly; however, the parsley developed more slowly. - Explanation: A semicolon precedes the conjunctive adverb, and a comma follows it.

SPELLING ANSWERS

COOP-S4-001 - Correct: A - Correct Answer: symmetrical - Explanation: “Symmetrical” is the correctly spelled form.

COOP-S4-002 - Correct: B - Correct Answer: persistent - Explanation: “Persistent” is the correct standard spelling.

COOP-S4-003 - Correct: C - Correct Answer: recommend - Explanation: “Recommend” is correctly spelled with one c and double m.

COOP-S4-004 - Correct: D - Correct Answer: endurance - Explanation: “Endurance” is misspelled; the correct spelling is “endurance.”

COOP-S4-005 - Correct: A - Correct Answer: thorough - Explanation: “Thorough” is misspelled; the correct spelling is “thorough.”

Title: The Empty Frame

Text:

At the community art show, Lena arranged three charcoal drawings on a folding wall. Between the second and third drawings, she hung an empty wooden frame. Her brother Tomas stared at it. “Did you forget one?”

Lena shook her head, though she had asked herself the same question all morning. The missing picture had been a portrait of their grandmother kneading bread. Lena had worked on it for weeks, but every version seemed stiff. Grandmother's hands looked posed instead of busy, and the flour on the table resembled snow.

Ten minutes before the doors opened, Grandmother arrived carrying a paper bag of rolls. She studied the blank space without asking for an explanation. Then she set the bag beneath the empty frame and began handing warm rolls to the volunteers.

Visitors soon gathered there. They traded memories of kitchens, recipes, and relatives who had taught them to cook. Some glanced through the frame at Grandmother as she laughed with a child. Lena realized that the space was not empty at all. It held movement, voices, and the smell of bread, none of which charcoal could capture.

At closing time, Lena left the frame in place. On a small card beneath it, she wrote, “A portrait still in progress.” For once, those words did not feel like an apology.

Stimulus Type: Scientific Passage

Title: Why Some Seeds Wait

Text:

A seed may appear inactive, yet it contains a living embryo and a supply of stored food. Many seeds do not begin growing as soon as they leave the parent plant. Instead, they enter dormancy, a temporary condition in which growth is suspended even when the seed remains alive.

Dormancy can protect a future plant from beginning its life at an unsafe time. For example, a seed released in autumn might encounter a few warm days before winter. If it sprouted immediately, the tender shoot could be killed by freezing weather. Some seeds therefore require a long period of cold before they can respond to warmth. Others have hard outer coats that water cannot easily penetrate. Weathering, digestive processes, or small cracks may eventually weaken those coats.

Not every seed of one species becomes ready on the same day. This staggered timing spreads risk. A brief favorable period followed by drought might destroy early seedlings, while seeds that remain dormant can try later. Farmers and restoration scientists sometimes imitate the needed conditions by chilling, soaking, or lightly scratching seeds before planting.

Dormancy is not simply delayed action. It is a set of biological controls that helps germination occur when signals suggest a better chance of survival.

ANSWER KEY + EXPLANATIONS

MATHEMATICS ANSWERS

COOP-M4-011 - Correct: A - Correct Answer: 24 - Explanation: Apply multiplication and division first: $48 \div 6 + 3 \times 7 - 5 = 8 + 21 - 5 = 24$.

COOP-M4-012 - Correct: B - Correct Answer: 60 liters - Explanation: The added 18 liters represent $\frac{9}{10} - \frac{3}{5} = \frac{3}{10}$ of capacity, so capacity is $18 \div \frac{3}{10} = 60$ liters.

COOP-M4-013 - Correct: C - Correct Answer: $n < 6$ - Explanation: Subtract 7 to obtain $4n < 24$, and divide by positive 4 to get $n < 6$.

COOP-M4-014 - Correct: D - Correct Answer: 11 minutes - Explanation: The rate is $156 \div 4 = 39$ labels per minute, and $429 \div 39 = 11$ minutes.

COOP-M4-015 - Correct: C - Correct Answer: 85° - Explanation: Quadrilateral angles total 360° , so $x = 360^\circ - 72^\circ - 98^\circ - 105^\circ = 85^\circ$.

COOP-M4-016 - Correct: D - Correct Answer: 202 square inches - Explanation: Total surface area is $2(9 \times 4 + 9 \times 5 + 4 \times 5) = 2(101) = 202$ square inches.

COOP-M4-017 - Correct: A - Correct Answer: 12:23 p.m. - Explanation: Adding 2 hours gives 11:35 a.m.; adding 48 minutes gives 12:23 p.m.

COOP-M4-018 - Correct: B - Correct Answer: 4.375 cups - Explanation: Ten servings are 2.5 times four servings, so $1.75 \times 2.5 = 4.375$ cups.

COOP-M4-019 - Correct: C - Correct Answer: $1/9$ - Explanation: With replacement, each blue probability is $4/12 = 1/3$, so $1/3 \times 1/3 = 1/9$.

COOP-M4-020 - Correct: D - Correct Answer: 88 - Explanation: The five scores total $5 \times 86 = 430$; the known scores total 342, leaving 88.

READING COMPREHENSION ANSWERS

COOP-R4-011 - Correct: A - Correct Answer: Its details did not convey the activity she wanted to show. - Explanation: Lena finds the hands stiff and the flour unrealistic, so the drawing fails to capture Grandmother's activity.

COOP-R4-012 - Correct: B - Correct Answer: A meaningful portrait can emerge through living moments rather than a fixed image. - Explanation: The conversations, movement, and aroma make the framed space portray Grandmother more fully than Lena's drawing.

COOP-R4-013 - Correct: C - Correct Answer: She now sees the unfinished work as an opening for discovery. - Explanation: Calling it "in progress" no longer feels apologetic because Lena recognizes value in what the frame invites.

COOP-R4-014 - Correct: D - Correct Answer: an admission of failure - Explanation: Earlier, Lena viewed the unfinished portrait as a shortcoming, but her changed perspective removes that sense of failure.

COOP-R4-015 - Correct: A - Correct Answer: An artist's missing portrait gains meaning when real interactions fill the space she had considered incomplete. - Explanation: This choice includes the absent drawing, the activity around the frame, and Lena's revised understanding.

COOP-R4-016 - Correct: B - Correct Answer: Weathering, digestion, or small cracks - Explanation: The second paragraph explicitly names these processes as ways that hard outer coats may be weakened.

COOP-R4-017 - Correct: C - Correct Answer: How dormancy regulates the timing of germination and improves survival - Explanation: The passage defines dormancy and explains how it controls delay growth until conditions are more favorable.

COOP-R4-018 - Correct: D - Correct Answer: It prevents one short period of poor conditions from destroying every new plant. - Explanation: Seeds becoming ready at different times spread risk when an early favorable period is followed by hardship.

COOP-R4-019 - Correct: A - Correct Answer: temporarily stopped - Explanation: Growth is suspended during dormancy because it pauses while the seed remains alive.

COOP-R4-020 - Correct: D - Correct Answer: A condition is defined, examples show its benefits, and practical applications follow. - Explanation: The author defines dormancy, illustrates protective mechanisms, and then describes how people imitate needed conditions.

VOCABULARY ANSWERS

COOP-V4-011 - Correct: A - Correct Answer: orderly - Explanation: Methodical describes an orderly, systematic way of completing a task.

COOP-V4-012 - Correct: B - Correct Answer: diminish - Explanation: To dwindle is to become gradually smaller or fewer, which is to diminish.

COOP-V4-013 - Correct: C - Correct Answer: shallow - Explanation: Profound describes great depth, while shallow describes little depth.

COOP-V4-014 - Correct: D - Correct Answer: assemble - Explanation: To dismantle is to take something apart, while to assemble is to put it together.

COOP-V4-015 - Correct: A - Correct Answer: natural - Explanation: Artificial means human-made or simulated, whereas natural means occurring without artificial production.

COOP-V4-016 - Correct: B - Correct Answer: not yet final - Explanation: The expected revision shows that the provisional proposal is temporary and not yet final.

COOP-V4-017 - Correct: C - Correct Answer: able to be recognized - Explanation: The tower's visible outline can still be recognized through the mist, so it is discernible.

COOP-V4-018 - Correct: D - Correct Answer: cow - Explanation: A sapling is a young tree, just as a calf is a young cow.

COOP-V4-019 - Correct: A - Correct Answer: weight - Explanation: A thermometer measures temperature, while a scale measures weight.

COOP-V4-020 - Correct: B - Correct Answer: provisions - Explanation: An archive stores records, while a pantry stores provisions or food supplies.

GRAMMAR ANSWERS

COOP-G4-011 - Correct: A - Correct Answer: Neither of the sisters forgot her sheet music. - Explanation: The singular antecedent “neither” agrees with the singular pronoun “her.”

COOP-G4-012 - Correct: B - Correct Answer: The collection of postcards belongs to my aunt. - Explanation: The singular subject “collection” requires the singular verb “belongs.”

COOP-G4-013 - Correct: C - Correct Answer: After we had locked the door, we walked toward the station. - Explanation: Past perfect correctly marks the earlier action before the later simple-past action.

COOP-G4-014 - Correct: D - Correct Answer: Between you and me, the shortcut is confusing. - Explanation: The preposition “between” requires the objective pronoun “me.”

COOP-G4-015 - Correct: B - Correct Answer: The supply list includes three items: a pencil, an eraser, and a ruler. - Explanation: A colon correctly follows a complete clause and introduces its list.

COOP-G4-016 - Correct: C - Correct Answer: The guide asked us to stay together, to speak quietly, and to watch the trail. - Explanation: All three coordinated actions use matching infinitive forms.

COOP-G4-017 - Correct: A - Correct Answer: Covered with frost, the branches glittered in the sun. - Explanation: The introductory modifier directly precedes “branches,” the noun it describes.

COOP-G4-018 - Correct: B - Correct Answer: Sentence 7 - Explanation: The poster's purchase price does not support the passage's focus on collecting and comparing sounds.

COOP-G4-019 - Correct: C - Correct Answer: I entered every measurement in a table, and Maya checked the measurements for errors. - Explanation: Repeating “the measurements” eliminates uncertainty about what Maya checked.

COOP-G4-020 - Correct: D - Correct Answer: We visited each site at the same times on Tuesday and Thursday; this schedule made the comparisons more reliable. - Explanation: A semicolon correctly joins the two closely related independent clauses.

SPELLING ANSWERS

COOP-S4-011 - Correct: A - Correct Answer: conscientious - Explanation: “Conscientious” is the standard spelling, including the sequence “sci” in its final syllables.

COOP-S4-012 - Correct: B - Correct Answer: rhythmically - Explanation: "Rhythmically" preserves the spelling of "rhythm" before the suffix "-ically."

COOP-S4-013 - Correct: C - Correct Answer: accommodation - Explanation: "Accommodation" is spelled with double c and double m.

COOP-S4-014 - Correct: D - Correct Answer: dimentions - Explanation: "Dimentions" is misspelled; the correct form is "dimensions."

COOP-S4-015 - Correct: C - Correct Answer: guarentee - Explanation: "Guarentee" is misspelled; the correct form is "guarantee."

COOP-S4-016 - Correct: D - Correct Answer: waive - Explanation: The verb "waive" means to give up or refrain from requiring the fee.

COOP-S4-017 - Correct: A - Correct Answer: envelope - Explanation: "Envelope" is the correctly spelled noun for the paper container described.

COOP-S4-018 - Correct: B - Correct Answer: altar - Explanation: "Altar" is the correctly spelled noun for the ceremonial structure described.

COOP-S4-019 - Correct: C - Correct Answer: wealthier - Explanation: Change the final y in "wealthy" to i before adding "-er."

COOP-S4-020 - Correct: D - Correct Answer: dissatisfied - Explanation: Adding "dis-" to the intact base word "satisfied" forms "dissatisfied."

Title: One More Name

Text:

Anika volunteered to organize teams for the library's Saturday quiz relay. She balanced the original list carefully: each team had one strong reader, one quick calculator, one student who knew science, and one confident speaker. By Friday afternoon, every name occupied a square in her color-coded chart.

On Saturday, the librarian introduced Owen, a new volunteer whose registration had arrived late. Anika pointed to a team and suggested that he could watch until someone needed help. Owen nodded, but he folded his blank name tag into smaller and smaller rectangles.

The first relay question asked teams to identify objects hidden inside cloth bags. While others guessed, Owen quietly noticed that one bag made a metallic click. "A compass," he said, explaining that its needle was tapping the case. His answer was correct.

Anika looked at her chart again. Its tidy rows had made the existing teams appear complete, but the activity itself did not require four-person groups. Before the next round, she erased the squares and assigned rotating roles: investigator, recorder, checker, and reporter. A fifth student could manage materials and choose the next role.

Soon every team wanted Owen to inspect a mystery bag. Anika kept the wrinkled blank tag beside her clipboard. It reminded her that a plan could be perfectly balanced on paper and still leave out something important.

Stimulus Type: Scientific Passage

Title: Whiskers as Measuring Tools

Text:

For many mammals, whiskers are not simply long hairs. Each whisker is rooted in a specialized follicle surrounded by nerves. When the whisker bends, those nerves send information to the brain. This system allows an animal to detect contact with nearby objects, often before its face reaches them.

Whiskers can also respond to moving air. An object changes the flow of air around it, and a sensitive animal may detect that disturbance. This ability is especially useful in darkness, narrow spaces, or cloudy water, where vision provides limited information. A rat can judge whether an opening is wide enough for its body, while a seal may follow water movements left by a swimming fish.

Whiskers do not operate alone. The animal moves them, compares signals from different sides of its face, and combines touch information with hearing, smell, and vision. Their length often relates roughly to body width, although the exact pattern varies among species.

Researchers study whisker sensing to understand animal behavior and to design robots that navigate where cameras perform poorly. Flexible sensors modeled on whiskers can bend against surfaces without requiring bright light. The biological system therefore offers both animals and engineers a way to gather spatial information through motion and touch.

Title: A Tour of Local Murals

Text:

[1] Our history club planned a walking tour of murals painted throughout the neighborhood. [2] First, Lena researched when each mural was created and who designed it. [3] She also discovered several details about the artists' materials. [4] Next, we arranged the stops so the group would not cross the same streets repeatedly. [5] The oldest mural was painted in 1998, it covers the side of the former fire station. [6] This building now contains a music school. [7] These facts helped us explain how both the artwork and the neighborhood had changed. [8] As a result, the tour connected visible images with the community's history.

ANSWER KEY + EXPLANATIONS

MATHEMATICS ANSWERS

COOP-M4-021 - Correct: A - Correct Answer: 39 - Explanation: Since $39 = 7 \times 5 + 4$, dividing 39 by 7 leaves a remainder of 4.

COOP-M4-022 - Correct: B - Correct Answer: $\frac{8}{21}$ - Explanation: The spent fraction is $\frac{2}{7} + \frac{1}{3} = \frac{6}{21} + \frac{7}{21} = \frac{13}{21}$, leaving $\frac{8}{21}$.

COOP-M4-023 - Correct: C - Correct Answer: 5 - Explanation: The digit sum is $5 + 7 + 8 + 3 = 23$, which leaves remainder 5 when divided by 9.

COOP-M4-024 - Correct: D - Correct Answer: 11 - Explanation: Solve $3x - 8 = 25$: add 8 to get $3x = 33$, then divide by 3.

COOP-M4-025 - Correct: A - Correct Answer: \$70 - Explanation: The sale price is 80% of the original, so $\$56 \div 0.80 = \70 .

COOP-M4-026 - Correct: B - Correct Answer: 25 - Explanation: The second term is $2(4) + 3 = 11$, and the third is $2(11) + 3 = 25$.

COOP-M4-027 - Correct: C - Correct Answer: 12 - Explanation: Exterior angles total 360° , so the polygon has $360^\circ \div 30^\circ = 12$ sides.

COOP-M4-028 - Correct: D - Correct Answer: (3, -2) - Explanation: Reflection across the y-axis changes -3 to 3; moving down 7 changes 5 to -2.

COOP-M4-029 - Correct: A - Correct Answer: 16 - Explanation: Convert 2.4 liters to 2,400 milliliters, then calculate $2,400 \div 150 = 16$ full cups.

COOP-M4-030 - Correct: C - Correct Answer: 8 - Explanation: A total of 30 requires $x = 10$; the range is then $10 - 2 = 8$.

READING COMPREHENSION ANSWERS

COOP-R4-021 - Correct: A - Correct Answer: One bag makes a metallic clicking sound. - Explanation: Owen identifies the compass after hearing its needle click against the case.

COOP-R4-022 - Correct: B - Correct Answer: A good plan must remain flexible enough to include people and their contributions. - Explanation: Anika improves her orderly but exclusionary chart by changing the roles so Owen can participate meaningfully.

COOP-R4-023 - Correct: C - Correct Answer: It represents the limitation she discovered in her original plan. - Explanation: The blank tag reminds Anika that her balanced chart had failed to include a valuable person.

COOP-R4-024 - Correct: D - Correct Answer: changing from one person to another - Explanation: The students take different roles in successive rounds, so the roles change from person to person.

COOP-R4-025 - Correct: B - Correct Answer: Owen uses careful observation to identify the compass. - Explanation: Owen's successful contribution shows Anika why observing from the side would waste a useful skill.

COOP-R4-026 - Correct: C - Correct Answer: Nerves around the follicle send information to the brain. - Explanation: The first paragraph directly explains that bending activates the nerves surrounding the specialized follicle.

COOP-R4-027 - Correct: D - Correct Answer: Whiskers gather spatial information, and their sensing method can inspire technology. - Explanation: The passage explains biological sensing and concludes with its value for robot design.

COOP-R4-028 - Correct: A - Correct Answer: They can collect information in dim, confined places without depending entirely on cameras. - Explanation: Whisker-like sensors bend against surfaces and function where light and camera performance are limited.

COOP-R4-029 - Correct: B - Correct Answer: designed in imitation of - Explanation: The flexible sensors copy the useful bending and sensing properties of biological whiskers.

COOP-R4-030 - Correct: D - Correct Answer: It connects a biological ability to a possible engineering application. - Explanation: The final paragraph shifts from animal sensing to robots designed with similar flexible sensors.

VOCABULARY ANSWERS

COOP-V4-021 - Correct: A - Correct Answer: ingenious - Explanation: A resourceful person finds clever solutions, so ingenious is the closest meaning.

COOP-V4-022 - Correct: B - Correct Answer: validate - Explanation: To authenticate something is to establish that it is genuine, which is to validate it.

COOP-V4-023 - Correct: C - Correct Answer: calm - Explanation: Serene means peaceful and calm rather than noisy or disturbed.

COOP-V4-024 - Correct: D - Correct Answer: obvious - Explanation: Obscure information is unclear or difficult to notice, while obvious information is readily apparent.

COOP-V4-025 - Correct: A - Correct Answer: enthusiastic - Explanation: Apathetic means lacking interest, whereas enthusiastic means showing strong interest or eagerness.

COOP-V4-026 - Correct: B - Correct Answer: not favoring either side - Explanation: Having no stake in either position makes the moderator neutral and impartial.

COOP-V4-027 - Correct: C - Correct Answer: easily noticeable - Explanation: Visibility from nearly every trail shows that the formation is prominent and easily noticed.

COOP-V4-028 - Correct: D - Correct Answer: theater - Explanation: A passport permits entry at a border, while a ticket permits entry to a theater.

COOP-V4-029 - Correct: A - Correct Answer: play - Explanation: A chapter is a division of a book, just as a scene is a division of a play.

COOP-V4-030 - Correct: B - Correct Answer: bridge - Explanation: Erosion can produce a canyon, just as construction can produce a bridge.

GRAMMAR ANSWERS

COOP-G4-021 - Correct: A - Correct Answer: Neither the lantern nor the candles provide enough light. - Explanation: With “neither...nor,” the verb agrees with the nearer plural subject “candles.”

COOP-G4-022 - Correct: B - Correct Answer: Students should organize their folders before class. - Explanation: The plural antecedent “students” agrees clearly with the plural possessive pronoun “their.”

COOP-G4-023 - Correct: C - Correct Answer: The wind blew several leaves across the porch. - Explanation: “Blew” is the correct simple-past form of the irregular verb “blow.”

COOP-G4-024 - Correct: D - Correct Answer: By the time the bus arrived, we had waited for twenty minutes. - Explanation: Past perfect marks the waiting that occurred before the bus arrived in the simple past.

COOP-G4-025 - Correct: C - Correct Answer: Before sunrise, the fishing boats left the harbor. - Explanation: A comma correctly follows the introductory prepositional phrase.

COOP-G4-026 - Correct: D - Correct Answer: Using binoculars, Marco observed the eagle on the distant branch. - Explanation: The opening modifier clearly describes Marco, the person using the binoculars.

COOP-G4-027 - Correct: A - Correct Answer: Because the path was icy, the hikers moved slowly. - Explanation: The subordinating conjunction “because” correctly makes the cause dependent on the main clause.

COOP-G4-028 - Correct: B - Correct Answer: Immediately after sentence 5, where it is now - Explanation: “This building” refers directly to the former fire station introduced in sentence 5.

COOP-G4-029 - Correct: C - Correct Answer: She also identified the paints and tools used to create each mural. - Explanation: The revision replaces vague wording with specific information relevant to researching the murals.

COOP-G4-030 - Correct: D - Correct Answer: The oldest mural was painted in 1998; it covers the side of the former fire station. - Explanation: A semicolon correctly separates the two closely related independent clauses.

SPELLING ANSWERS

COOP-S4-021 - Correct: A - Correct Answer: exhilarate - Explanation: “Exhilarate” is the standard spelling, with “hil” following the initial “ex.”

COOP-S4-022 - Correct: B - Correct Answer: irresistible - Explanation: "Irresistible" combines the prefix "ir-" with "resist" and the suffix "-ible."

COOP-S4-023 - Correct: C - Correct Answer: nuisance - Explanation: "Nuisance" is the standard spelling, with "ui" followed by "sance."

COOP-S4-024 - Correct: D - Correct Answer: consistant - Explanation: "Consistant" is misspelled; the correct form is "consistent."

COOP-S4-025 - Correct: A - Correct Answer: discription - Explanation: "Discription" is misspelled; the correct form is "description."

COOP-S4-026 - Correct: B - Correct Answer: usefull - Explanation: "Usefull" is misspelled; the correct form is "useful," with one final l.

COOP-S4-027 - Correct: C - Correct Answer: formerly - Explanation: "Formerly" means previously, which correctly describes the building's earlier use.

COOP-S4-028 - Correct: D - Correct Answer: isle - Explanation: "Isle" is the correct spelling for a small island.

COOP-S4-029 - Correct: A - Correct Answer: permitted - Explanation: Double the final t in "permit" before adding "-ed."

COOP-S4-030 - Correct: B - Correct Answer: enviable - Explanation: Change the final y in "envy" to i before adding "-able."

Title: The Red Chalk Marks

Text:

Kai was planning a neighborhood scavenger hunt when he noticed small red triangles drawn beside several curbs. They seemed perfect for a clue. He followed the marks, expecting them to form a pattern, but they appeared at uneven intervals and pointed in different directions.

Near the final triangle, Ms. Alvarez from the maintenance crew was pulling wet leaves from a storm drain. Kai asked whether the marks belonged to a game. She explained that she had drawn each triangle beside a drain that needed attention. Heavy rain was expected overnight, and a blocked drain could send water across the sidewalk or into nearby doorways.

Kai looked back along the street. What had seemed random now made sense: the marks appeared wherever leaves had gathered thickly. He put his scavenger-hunt notes in his pocket and asked for a pair of gloves. Together, he and Ms. Alvarez cleared three more grates. Water from a garden hose slipped through each opening without pooling.

The next morning, the storm had passed. Kai found twigs pressed against the clean grates, but the sidewalks were clear. He kept the red triangles in his hunt, although he changed the clue. Instead of asking players to discover a secret pattern, he wrote, "Find a small sign of work that protects an entire street."

Title: The Chemistry of an Old Book's Scent

Text:

People often describe old books as smelling sweet, woody, dusty, or slightly like vanilla. That scent does not come from a single ingredient. It develops as paper, ink, glue, and other materials slowly change and release tiny airborne molecules called volatile organic compounds.

Much traditional paper contains cellulose, a substance made of long molecular chains. Over time, heat, light, moisture, and acids can break those chains into smaller substances. Some of the resulting compounds have recognizable odors. Lignin, another component common in wood-based paper, can contribute molecules with vanilla-like notes as it changes.

Smell can suggest that chemical aging is occurring, but it cannot precisely determine a book's age. Different papers and bindings contain different materials, and storage conditions greatly affect the rate of change. A newer book kept in heat and humidity may deteriorate faster than an older volume stored in a cool, stable room.

Libraries slow this process by controlling temperature, moisture, light, and air quality. Conservators may also place fragile items in protective enclosures made from stable materials. These measures cannot reverse every chemical change, but they can reduce the speed of further deterioration and help preserve books for future readers.

ANSWER KEY + EXPLANATIONS

MATHEMATICS ANSWERS

COOP-M4-031 - Correct: A - Correct Answer: -1 - Explanation: The additive inverse is 4 and the reciprocal is $-1/4$, so their product is -1 .

COOP-M4-032 - Correct: B - Correct Answer: $1/2$ - Explanation: First, $3/4 - 2/5 = 7/20$; then $7/20 \div 7/10 = 7/20 \times 10/7 = 1/2$.

COOP-M4-033 - Correct: C - Correct Answer: 24 - Explanation: Adding the equations gives twice the larger number: $41 + 7 = 48$, and $48 \div 2 = 24$.
